APD responded to 507 Ritchie Ave. reference a fight with a gun. Officers confronted Lawrence Rogers at the side door to the house and observed he had a pistol in his right hand. Lawrence Rogers paced back and forth throughout the first floor of the house while he was holding the gun. Raymond Jones was also inside the house, and he was seated on couch in the family room. Lawrence Rogers was agitated and arguing with Raymond Jones. Officers positioned at the side door gave clear directions to him to, "drop his gun and come outside." Lawrence Rogers continued to pace through the house and then eventually paused at the top of the side stairwell inside the house, while holding the gun in his right hand. Lawrence Rogers then leveled the gun at the officers, who were standing outside at the threshold of the side door. One officer fired shots from his rifle and the other officer fired shots from his pistol at Lawrence Rogers. Lawrence Rogers was struck by the officer's rounds and fled into the family room where Raymond Jones was sitting on the couch. Lawrence Rogers then shot and killed Raymond Jones before he collapsed and died on the floor next to the couch.

Please do a direct comparison between the officer's rifle and pistol and the casings recovered from outside the side door. Please do a direct comparison between the pistol recovered under Lawrence Roger's body and the casings recovered in the family next to where he died. Please test the pistol recovered under Lawrence Roger's body for the presence of comparable DNA. Please compare the blood collected on the cotton swabs to the DNA Blood Standard of Lawrence Rogers. Please examine the bullet fragments recovered from the scene and see if they can be compared to the submitted firearms. Please examine the bullet projectiles recovered from both bodies to see if they can be compared to any of the submitted firearms.
