Where:

OPOTA Tactical Training Center
1960 U.S. 42 SW

Course Information:

This course is designed for law enforcement officers who carry off duty and/or are assigned to “plain clothes” details. Most officers who carry a concealed handgun have had no structured training in the art of concealed carry — a deficit that can lead to bad habits and assumptions, which, in turn, can result in poor performance or negligent discharges. This course teaches technique basics in presentation, grip, stance and carry methods. Among other material covered in the course, the instructor identifies various one-handed and two-handed presentations of a concealed handgun from the standing, seated and supine positions; demonstrates various concealed carry weapons, gear and accessories as well as the advantages and disadvantages of each; and identifies various concealed-carry handgun locations and the advantages and disadvantages of each.
