

OHLEG UPGRADE

GET MORE FROM NEW SWIFT RMS

OHLEG

OHIO LAW ENFORCEMENT GATEWAY

When Ohio Attorney General Dave Yost took office in January 2019, he identified 22 high-priority goals for completion by 2022, the end of his first term in the statewide office. The Ohio Law Enforcement Gateway (OHLEG) upgrade was among those priorities, and we are excited to share the newest enhancements. OHLEG's new records management system, SWIFT RMS, provides incident reporting, electronic citations, an OH-1 crash module, property/evidence management, and much more. The new software also enables free and easy data exporting to OIBRS and OLLEISN. Other features include:

Case Management

- The creation of cases from one or more linked reports
- Flexible case titling
- Tracking of expenses, notes and case history
- Assignment of case tasks for follow-up
- Simultaneous transfer of case clearance to all linked reports
- Ability to link analysis diagramming

OH-1 Crash Report

- Electronic submission of crash data to the Department of Public Safety
- An intuitive user interface that displays only relevant fields based on user input
- Simple and easy-to-understand validation messages
- Ability to include crash scene diagrams

Booking

- Ability for agencies to record the booking of suspects into a holding facility
- Configurable medical intake questionnaire
- Tracking of inmate's property
- Ability to attach images and documents related to the booking record

Intelligence Reports

- Tracking of incoming intelligence tips and information
- Confidential and permission-driven review and submission protocols
- Ability to approve and assign incoming intelligence information

DAVE YOST
OHIO ATTORNEY GENERAL
