Ohio Attorney General's Office
Bureau of Criminal Investigation
Investigative Report

2022-1356
Officer Involved Critical Incident - 1659 S. Main Street, Akron, Ohio 44301

Investigative Activity:	Video Analysis; Video Review; Axon Investigate Used
Involves:	OOCIC (O), BCI (O)
Activity Date:	2/17/2023
Activity Location:	BCI – 4055 Highlander Parkway, Richfield, Ohio 44286
Authoring Agent:	SA Charles Moran #67

Narrative:

On Friday, February 17, 2023, Ohio Bureau of Criminal Investigation (BCI) Special Agent (SA) Charles Moran (Moran) documented his use of Axon Investigate to interpret video presentations from the Ohio Organized Crime Investigations Commission (OOCIC). One of the video presentations consisted of synchronized body-worn camera (BWC) videos and the other video presentations consisted of eight individual BWC videos. The BWC videos were from the Akron Police Department (APD) and recorded the incident and officer-involved shooting that occurred on June 27, 2022, involving a male subject, Jayland Walker, and eight APD officers.

Axon Investigate
SA Moran used Axon Investigate, a video analysis software program, to interpret the OOCIC video presentations, mark images, and to perform workflows consisting of cropping marked images and resizing the marked images.

Axon Investigate – Interrogate Tab
SA Moran performed a review of all of the OOCIC video presentations. (See BCI Investigate Report, "2022-08-31 Video Review – OOCIC Synchronized Presentation" for further details.) SA Moran marked images for the following OOCIC video presentations:

- 22-00060 Synchronized Presentation – Speed Views
- Involved Officers – [redacted] – Speed Views
- Involved Officers – [redacted] – Speed Views
- Involved Officers – [redacted] – Speed Views
- Involved Officers – [redacted] – Speed Views
- Involved Officers – [redacted] – Speed Views
- Involved Officers – [redacted] – Speed Views
- Involved Officers – [redacted] – Speed Views
- Involved Officers – [redacted] – Speed Views

This document is the property of the Ohio Bureau of Criminal Investigation and is confidential in nature. Neither the document nor its contents are to be disseminated outside your agency except as provided by law - a statute, an administrative rule, or any rule of procedure.

SA Moran used Microsoft Excel spreadsheets to track various sets of information related to the video presentations. The activity tracked was:

- OOCIC Synchronized Presentation Speed Views and Individual Officer Speed Views Identified Timecodes and Frame Numbers
    - This spreadsheet tracked the timecode effect numbers, if the images were included in the PDF marked image build, and each frame number for each officer within the timecode effect number.
- Activity Observed in OOCIC Synchronized Presentation and Individual Officer BWC Presentations
    - This spreadsheet tracked potentially relevant moments and movements identified during the review. The moments and moments were color coded by frame numbers from the individual officer's video presentations.
- [redacted] Frames Identified – Original and Additional
    - This spreadsheet tracked frame numbers identified in [redacted] s video presentation.
- [redacted] Frames Identified – Original and Additional
    - This spreadsheet tracked frame numbers identified in [redacted]'s video presentation.
- [redacted] Frames Identified – Original and Additional
    - This spreadsheet tracked frame numbers identified in [redacted]'s video presentation.
- [redacted] Frames Identified – Original and Additional
    - This spreadsheet tracked frame numbers identified in [redacted]' video presentation.
- [redacted] Frames Identified – Original and Additional
    - This spreadsheet tracked frame numbers identified in [redacted]'s video presentation.
- [redacted] Frames Identified – Original and Additional
    - This spreadsheet tracked frame numbers identified in [redacted]'s video presentation.
- [redacted] Frames Identified – Original and Additional
    - This spreadsheet tracked frame number's identified in [redacted]'s video presentation.
- [redacted] Frames Identified – Original and Additional
    - This spreadsheet tracked frame number's identified in [redacted]'s video presentation.

Axon Investigate – Workflow Tab

This document is the property of the Ohio Bureau of Criminal Investigation and is confidential in nature. Neither the document nor its contents are to be disseminated outside your agency except as provided by law - a statute, an administrative rule, or any rule of procedure.

All of the marked images were exported as Bitmap (BMP) images due to BMP being lossless. SA Moran converted the BMP marked images to PDF and organized the marked images from the synchronized presentation with the marked images from each officer's presentation in chronological order by timecode effect number and frame number. This created a cascading effect of the event in PDF images. (See file, "OOCIC – Synchronized Presentation and Individual Officers – Speed Views – PDF Build All" for details.)

SA Moran used the "Activity Observed" spreadsheet to select potentially relevant marked images and then used Axon Investigate to perform workflow processes including cropping and resizing the relevant marked images. The "Workflow Notes for Axon Investigate for Activity Observed" spreadsheet was attached to this report.

Each relevant marked image was cropped to a unique size. Each relevant marked image was then resized to 4x the size of the unique cropped image. The interpolation method used in Axon Investigate was "Bicubic" due to the images being easier to visually process and since no measurements, no forensic observations, and no aspect ratio correction was performed. Workflow notes (WN) were created for each workflow process for each relevant marked image. The WNs showed the crop node settings that included the width, height, and the X and Y coordinates for each relevant marked image. The WNs also showed the resize node settings that included the width, height, preset size, and interpolation method. Each workflow image was exported as a BMP image due to it being lossless. The WNs were converted to PDF for each individual officer's video presentation. Each PDF was attached to this report.

SA Moran converted the BMP workflow images to PDF. SA Moran used the PDF file, "OOCIC – Synchronized Presentation and Individual Officers – Speed Views – PDF Build All" and inserted the PDF workflow images into the file in chronological order. This created a cascading effect consisting of a pattern of images. The pattern was generally:

- Initial marked image – synchronized presentation marked image (all 12 BWC videos in one screen)
    - Next marked image – individual officer's video presentation marked image (based upon timecode effect or frame number)
        - Next marked image – individual officer's video presentation marked image with workflow (cropped and resized)

SA Moran saved the PDF build with all of the marked images as, "OOCIC – PDF Build – All Marked Images and Workflow Images – Chronological." Please refer to that file for further details.

This document is the property of the Ohio Bureau of Criminal Investigation and is confidential in nature. Neither the document nor its contents are to be disseminated outside your agency except as provided by law - a statute, an administrative rule, or any rule of procedure.

This was done to assist the reviewer with understanding and observing the chronological events, movements, and positions of Jayland Walker and each involved officer.

Reference Item:
The OOCIC video presentations, the Axon Investigate project file, and all of the BMP marked images and BMP workflow marked images were placed on a USB thumb drive. All of the BMP marked images converted to PDF were also placed on a USB thumb drive. The spreadsheets (both Microsoft Excel and PDF) were also placed on the USB thumb drive. The WNs were also placed on the USB thumb drive. The USB thumb drive was submitted to the BCI SIU case file as Reference Item U. Please note that the materials on this USB thumb drive had a combined file size of 42.2GB.
