

Ohio Attorney General's Office
Bureau of Criminal Investigation
Investigative Report

2021-1772

Officer Involved Critical Incident - 300 Wood Street Apt. A8, Mansfield,
OH

Investigative Activity: Officer Boggs' Personnel and Training File
Activity Date: October 11, 2021
Authoring Agent: SA Cory Momchilov #64

Special Agent (SA) Cory Momchilov (Momchilov) obtained copies of Officer Mark Boggs' Mansfield Police Department personnel and training file.

Personnel File

On November 14, 2016, Officer Boggs was sworn in as a police officer with the Mansfield Police Department.

Officer Boggs received an "Outstanding Performance" letter from Safety Service Director Lori Cope on July 5, 2019.

Officer Boggs received a letter from Richland County Prosecutor Gary Bishop, recognizing Officer Boggs testimony during a trial as, "exceptionally credible, professional and explained their actions to the judge and jury with ease and humility."

Officer Boggs also has numerous letters of thanks and recognition from citizens.

SA Momchilov did not locate any disciplinary records in Officer Boggs' personnel file.

Training File

Officer Boggs completed the Ohio Basic Peace Officer Training Academy through North Central State College on April 29, 2016.

Officer Boggs has completed numerous training courses, to include Crisis Intervention (40 hours), and is also Taser certified.

Firearms

Records indicate that Officer Boggs last qualified with his duty weapon on December 11, 2020.

A copy of Officer Boggs' personnel file, training file and firearms qualification are attached to this Investigative Report.

RE: Public Records Request

On Tuesday, April 18, 2017, the City received a public records request regarding interaction by officers of the Department with Tyrone Gray Jr. on March 28, 2017. Included within that request were copies of your personnel file. Copies of such are being furnished to the Law Department for review and response to the full request. This notice is being furnished in compliance with Section 7.5 of the CBA. Also pursuant to the CBA, copies of your personnel file records given to the Law Department will be made available to you.

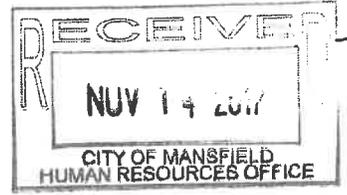

Respectfully,

David L. Remy
Human Resources Director

Ethic Policy

**City of Mansfield
Consent and Release Form
for Drug and Alcohol Test Program**

I acknowledge that I have received a copy of, have been duly informed, and understand the City of Mansfield drug and alcohol testing policy and procedures. I have been provided with information concerning the impact of the use of alcohol and drugs on job performance. In addition, I have been informed on how the tests are conducted, what the test can determine and the consequence of testing positive for alcohol/and or drug use.

I have been informed of the City of Mansfield Employee Assistance Program. I understand that if I voluntarily come forward and ask for assistance to deal with a drug or alcohol problem through the Employee Assistance Program, that my job security or promotional opportunities will not be jeopardized by such request.

I understand that a confirmed positive drug or alcohol test result may result in discipline and/or in a referral to the City of Mansfield Employee Assistance Program and if a referral is made that I will be required to successfully complete the rehabilitation program. Disciplinary action will be taken against me if I refuse to take a drug/alcohol test, refuse the opportunity for rehabilitation, fail to complete a rehabilitation program successfully, or again test positive for drugs/alcohol within two (2) years of completing an appropriate rehabilitation program. I understand that such disciplinary action, as described herein, may include dismissal from the City of Mansfield.

November 4, 2016

Mark Boggs

Dear Mr. Boggs:

The City of Mansfield is pleased to confirm your hiring as a Probationary Patrol Officer with the Mansfield Police Department. You will be sworn in on November 14, 2016 at 11:00 a.m. in the Hutchison Classroom which is located on the 1st floor of the City Administration Building. Your first day of duty will be November 14, 2016.

The position of patrol officer is a classified one under the civil service laws of Ohio. Additionally, it is subject to the rules and regulations of the Mansfield Civil Service Commission, applicable city ordinances, and policies and procedures of the City, in general, and of the Police Department in particular. Your probationary period will last one (1) year from date of appointment.

You will be advised of the date and time of your employment orientation with the Finance Department and Human Resources Department. At that orientation you will need to have with you your social security card, along with those of all your dependents, your driver's license and, since all payroll is done via direct deposit, a checking or savings account deposit slip.

We look forward to having you as a part of our team.

Sincerely,

Lori A. Cope
Safety Service Director

October 19, 2016

Mr. Mark Boggs

Dear Mark:

We are pleased to hereby extend to you a conditional offer of employment as a Police Officer with the City of Mansfield, Division of Police. This offer is specifically contingent upon your successful completion of the required medical examinations, including hearing and vision, and a psychological examination.

Your medical examination has been scheduled for Wednesday, October 26, 2016 at 11:30 a.m. It will be conducted at Ohio Health /Workable, 1750 West Fourth Street, Mansfield, Ohio. Please fast (no food, drink, or tobacco; except water) **for twelve hours prior to your examination.** You will also need to take the enclosed Non-DOT drug testing form with you to the examination. You will also be required to complete a cardiac stress test which is scheduled for the same date.

If you have questions, please contact Sergeant Carver at 419-755-9742.

Sincerely,

Lori A. Cope
Safety Service Director

Hi.....

Yesterday my mother called me quite upset. A car running from the police crashed into her retaining wall at 295 Sturges Ave at about 5pm. She was anxious not knowing what was going on. One of the female officers came up to the house.....standing outside so my mom felt safe with all of the Corona mess going around.....and let her know what was going on.

Part of what really upset my mom is that she had just had that wall replaced a few years ago.....and now it's busted up. Right after the crash.....she had gone outside to see what had happened. She saw that there were blocks of her wall laying on the sidewalk and in her driveway.....behind her car. Some of those blocks are very heavy and she had no way of moving them. It was dark out by the time all of the police work was done.....and the car removed. She went out to look things over this morning.....and the blocks that had gotten knocked off.....were stacked back in place. The police officers must have stacked them back up. Unfortunately I have no way of knowing who the officers are.....but your office should know from their report. I want them to know that all that they did last night.....was very much appreciated by my mother and me!

Thank you all.....for all you do!

Sherry Craig

Re: Outstanding Performance

This letter is in reference to the call you handled last week on Florence Ave. We were fortunate to have a subject record the incident involving our police officers, the suspect, and citizens. We have since gained access to that recording.

This was a prime example of the situations we are faced with on a regular basis. While knowing the public is recording us can be uncomfortable and often dangerous, the recording shows your high level of professionalism and composure. Your actions that day were a clear reflection of your dedication to the safety of your fellow officers and the citizens of Mansfield.

I am very proud that you are a part of the Police Division and thank you for your commitment.

Sincerely,

Lt. Carroll,

I just wanted to let you know that myself and Det. Miller went to Akron today and met with the victim, Sandra Noonan. Mrs. Noonan advised me that the officers on the scene treated her great. Mrs. Noonan advised that she was all alone in Mansfield, so an officer stayed with her at the hospital with her, until a family member arrived. This was a very scary event for Mrs. Noonan, but officers made her feel safe. I just wanted to let you know how well your officers treated Mrs. Noonan. Mrs. Noonan also picked out the suspect in the photo line-up, so hopefully charges will approved shortly. If you have any questions, let me know.

RE: State v. Robert Hale, 17CR373
Compliment to Officers Mark Boggs, Ryan Grimshaw and Cameron Shepherd

Dear Chief Kenneth Coontz,

Greetings – I write this letter of gratitude to compliment the professional and exemplary work performance of Officers Mark Boggs, Ryan Grimshaw and Cameron Shepherd for their investigation during a traffic stop that resulted in felony drug charges and culminated with the trial testimony by each officer.

During a one day trial, the prosecutor's office presented to a jury the case of the State of Ohio vs. Robert Hale. In the midnight hour of March 26, 2017, Officers Boggs and Grimshaw made a traffic stop based upon astute observations. As Officers Boggs and Grimshaw approached the stopped vehicle, the front vehicle passenger made "deliberate" actions involving moving his body to see the approaching Officer Boggs, bending at the waist lowering his right shoulder and arm, appearing to either retrieve or place something under the front seat. Officer Shepherd and his training officer arrived within moments of the stop. Tactically and legally, the officers made competent decisions that both preserved their collective safety and complied with the law and best practices.

During testimony, as "first-timers" Officers Boggs and Shepherd were exceptionally credible, professional and explained their actions to the judge and jury with ease and humility. I was particularly impressed how both Boggs and Shepherd, upon taking the witness stand, acknowledged the judge and jury with a sincere greeting. Officer Grimshaw provided testimony that only a veteran practitioner could as he explained during cross-examination that obtaining DNA or fingerprints off of a cellophane bag was impractical and cost prohibitive. Each officer appropriately responded to challenges of items alleged to be missing from their reports.

During my closing argument to the jury I stated "I am proud of Officer Boggs, Officer Grimshaw and Officer Shepherd. I am glad they are out there patrolling and protecting". Truly, as a former law enforcement professional, I was impressed and pleased by the collaboration between the prosecutor's office and each officer. I eagerly await the privilege and opportunity to work with the professionals like Officer Boggs, Grimshaw and Shepherd.

Respectfully,

Raymond K. Hamilton

February 1, 2017

Dear Sir-

I am 63 years old and have been a life long resident of Mansfield. I've lived in my current home for over 30 years and love my neighborhood.

Since late fall of 2016 one of my neighbors has been driving a semi with an attached flat bed trailer which he had parked in front of my home and my next door neighbors. It's an eyesore when looking out my front window and very noisy as he has it left it idling for up to 7 hours at a time with lights on, sometimes during the day, often at night. Other neighbors mentioned that police officers had asked them who the truck belonged to on a couple of occasions but appeared unable to make contact with anyone at the home.

On the night of Thursday, January 5 this year, the truck arrived out front at around 11⁴⁵ PM and was still running at 1^{AM} or so. I guess lack of sleep finally caused me to reach a point where I called the police.

Very shortly, two very nice young officers arrived. I was able to speak with them and explain the situation.

I do realize that compared to the much more serious and violent crimes that police have to handle every day that my complaint is small, but they dealt with it as just as important. These two officers were so very courteous, kind and considerate to me and to my concern.

I was able to find out that it was Officer Boops and Officer Drimshaw and just wanted both you and them to know how much I value them.

Whatever action they were able to take has apparently solved the problem. Within 30-45 minutes after they left, the gentleman drove the truck away and he hasn't had his truck parked anywhere on our street since then.

In the current hateful atmosphere of our country, police officers are not given enough recognition and thanks for putting their lives on the line every day. From this citizen who had a comparatively small problem and in acknowledgement of the much larger ones you deal with, I just wanted to say thank you.

Please let Officer Boops and Officer Drimshaw know how much I appreciate their help and kindness.

Thank you and all of your officers for
all that you do. My blue punch
light to support all of you is still
lit!

Sincerely,
Barbara Jones

Off. Boggs,

I was contacted by Mr. Walter Harfman, the son of Ms. Maria Hunsinger, who wanted to show their gratitude to you for "saving the life of Ms. Hunsinger". On 4/13/2018 you responded to 1807 Stoney Ridge Ct. reference a medical emergency. Mr. Harfman believes your actions on that day saved his mother. Ms. Hunsinger and Mr. Harfman would like to meet with you to demonstrate their appreciation by personally thanking you. Please call Mr. Harman at [REDACTED] upon your return to work.

Your work and professionalism represents yourself and this department in a positive image with the public. Keep up the good work!

MB The undersigned declares that he or she is a voluntary use of the employer's fitness facility and hereby waives and relinquishes all rights to Worker's Compensation benefits under Chapter 4123 of the Ohio Revised Code of any injury or disability incurred while participating in this listed activity.

MB The undersigned hereby releases, waives, discharges and covenants not to sue the City of Mansfield, the William J. Taylor Fraternal Order of Police Lodge #32, the Mansfield Police Recreation League, Inc., their officers, agents and employees (releasees) from all liability to the undersigned, his or her personal representatives, assigns, heirs and next of kin for any and all loss or damage, and any claim or demands therefore on account of injury or loss to the person or property of the undersigned whether caused by the negligence of releasees or otherwise while the undersigned is in the City's fitness room. The undersigned further agrees to indemnify and hold harmless the releasees and each of them from any loss, liability, damage or cost they might incur due to the presence of the undersigned in the fitness room, whether caused by the negligence of releasees or otherwise. The undersigned further assumes full responsibility for and risk of bodily injury, death or property damage or loss due to the negligence of releasees or otherwise while in the fitness room.

THE UNDERSIGNED HAS READ AND VOLUNTARILY SIGNS THE RELEASES AND WAIVERS OF LIABILITY AND INDEMNITY AND FURTHER AGREES THAT NO ORAL REPRESENTATIONS, STATEMENTS, OR INDUCEMENTS APART FROM THE ABOVE WRITTEN STATEMENTS HAVE BEEN MADE.

**TASER® Conducted Energy Weapon (CEW)
CEW User Applicant Certification Form
Annual Recertification**

Effective: June 22, 2020

Which CEWs were you certified on (Check all that apply): M26 X26 X26P X2 X3

Name: Mark Boggs Agency: MANFIELD POLICE DEPT
Email: MBOGGS@CI.MANFIELD.OH.US Phone: 419 755 9724
Address/State/Zip: 32 N STEAMBOAT ST MANFIELD OH 44903

By signing below, I hereby acknowledge receipt of TASER's Product Warnings. I understand that I must Read and understand these warnings PRIOR to participating in any hands-on CEW drills required by the certification Course.

Student Signature: (Required) 

TASER Instructor Use Only

Instructor is required to verify that applicant has successfully completed all CEW User Certification/Recertification requirements.

- Review current Annual User Recertification Course PowerPoint Presentation(s) & training bulletins (if applicable)
- Demonstrate safe handling of CEW to include:
proper finger positioning, aiming and deploying at preferred target area and while loading / unloading
- Deploy a minimum of 2 live cartridges (for each weapon certification), placing both probes in preferred target zones
- Perform a proper warning ARC (Safety warning: remove cartridge from X26P before conducting Arc warning)
- (X2 & X3) Utilize the ARC switch to re-energize deployed probes

I hereby certify that the above-named applicant has satisfactorily completed all components of the TASER End-User Certification, or Annual Re-Certification, training program and is hereby certified as a user of this system for one year.

Mansfield, Ohio Division of Police Response to Resistance/Aggression

Rules & Regulations:

- §1.51 - Officers shall carry firearms in accordance with law and established Division procedures.
- §1.55 - Employees shall not use more force in any situation than is reasonably necessary under the circumstances. Employees shall use force in accordance with law and Division procedures.
- §1.56 - Employees shall not use or handle weapons in a careless or imprudent manner. Employees shall use weapons in accordance with law and Division procedures.

Policy:

Officers, in performing their lawful duties, have a need to overcome physical resistance and therefore are authorized to use physical force, up to and including deadly force, to affect a lawful arrest and need not desist in their attempt merely because resistance is offered but must overcome the resistance to bring the arrestee under physical control. An officer is justified in using deadly force when he reasonably believes that the use of such force is necessary to prevent death or serious physical injury to himself or others including the suppression of riots in accordance with state law.

Response to Resistance/Aggression:

- A. Division employees will use only the minimum amount of force which is necessary and reasonable to control a situation, effect an arrest, overcome resistance to arrest or defend themselves from injury. No employee will use unreasonable or excessive force toward any person.
- B. When the Response to Resistance/Aggression is necessary, the degree of force that is employed should be in direct relationship to the amount of resistance employed by the person or the immediate threat the person poses to the employee or others.
- C. The Response to Resistance/Aggression by employees of the Division will, whenever possible, be progressive in nature. This force may be in the form of advice, warnings, persuasion, verbal encounters, physical contact, use of baton or other less-lethal weapons, or the use of deadly force.
- D. Deadly force is any force which carries a substantial risk that it will proximately result in the death of any person. The use of deadly force is justified under conditions of extreme necessity ONLY AS A LAST RESORT, when all lesser means have failed or cannot reasonably be employed and only under circumstances described below:
 - 1. Self-defense - To prevent death or immediate danger of serious physical injury to oneself.
 - 2. Defense of others - To prevent death or immediate danger of serious physical injury to others.
 - 3. Apprehension or Escape - To apprehend or prevent the escape of persons against whom the use of deadly force is authorized under (1.) or (2.) above, all lesser means have been reasonably exhausted and some warning has been given, if feasible.
 - 4. Suppression of riot - To protect persons or property during a riot when necessary to disperse or apprehend rioters when the use of deadly force is authorized in (1.) or (2.) above.

Prohibitions:

- A. Warning shots are prohibited.
- B. Firing at or from moving vehicles is prohibited except when all other reasonable means have failed and is authorized in [D.(1), (2.) or (3.)] above.
- C. Carrying firearms or dangerous ordinance while under the influence of alcohol or drugs is prohibited except when authorized.
- D. Weapon-mounted flashlights are NOT to be used in a manner inconsistent with Division policy and will NOT replace the officer's handheld flashlight. A weapon-mounted light is a tool to be used as an aid during situations where the use of a firearm is warranted.

Firearms Safety: I will:

- A. Promote firearms safety through my own actions.
- B. Never draw firearms as a joke or jest.
- C. Regard all firearms as being loaded.
- D. Know and use the safety devices of all firearms with which I am armed.
- E. Never draw, point, direct or exhibit a firearm unless I intend to shoot.
- F. When possible or practicable, issue a verbal warning to the suspect before firing.
- G. First identify my target and insure a clear field of fire before discharging a weapon.
- H. Never arm myself with a weapon I am not fully qualified to use.
- I. Secure and store weapons in such a way as to prevent unauthorized access.
- J. Bear in mind at all times that my conduct in handling weapons is my own responsibility.

NOTE: See General Order 1.3 for a detailed explanation of the circumstances, restrictions, and additional considerations involving the Response to Resistance/Aggression, deadly force, firearm and reporting requirement.

TASER

TRAINING ACADEMY

VERSION 20

TASER® Conducted Electrical Weapons (CEWs)

Part 1: End User Certification Test

PRINT LEGIBLY AND CLEARLY PLEASE!

Name: PR BOGGS #294 New Certification / Recertification

Agency: MAUSFIELD POLICE DEPARTMENT

Training Date: 9-14-17 Location: MAUSFIELD POLICE DEPARTMENT

1. According to the Version 20 TASER International, Inc. (TASER) training program, how long before presenting a user (or other) TASER Conducted Electrical Weapon (CEW) course or program is a CEW instructor required to check the TASER website to ensure the program includes the most current version of the training, warning, release, and product materials:
 - a) 6 months
 - b) 1 month
 - c) 1 week
 - d) 72 hours
2. In considering the use of a CEW:
 - a) Do not use for verbal defiance
 - b) Do not use for belligerence
 - c) Do not use for punishment
 - d) Do not use for horse play
 - e) All of the above
3. The preferred target areas (with the exception of sensitive CEW target areas) for CEW exposure:
 - a) Lower center mass (below chest or area of the heart) and legs for front exposure
 - b) Below the neck area for back exposures
 - c) Anywhere on the person's body
 - d) a and b
 - e) a and b (with the back being the most preferred area)
4. True/False As with any use of force, the longer the CEW exposure the greater the risk of potential cumulative physiologic, metabolic, and other effects.
5. True/False The officer should avoid intentionally targeting the CEW on sensitive areas of the body such as the head, throat, breast, chest or area of the heart, genitals, or known pre-existing injury areas without legal justification.
6. True/False Probe deployments are usually more desirable/effective than drive stuns.

7. True/ False The further a CEW exposure is away from the heart and the lower the delivered electrical charge the greater the safety margin for the CEW affecting the person's heart.
8. True/ False The need for multiple 5-second cycles, or extended or prolonged CEW exposures, may be avoided or reduced by "controlling/cuffing under power" during the "window of opportunity".
9. True/ False TASER CEWs are serious weapons and are to be treated as such at all times.
10. When deploying probes to the front of a person's body, the CEW should generally be aimed:
- At the face
 - At the chest or area of the heart
 - At the waist area to split the beltline
 - At the throat
 - At the head
11. The risk (or probability) of a CEW causing or contributing to a person's cardiac arrest is:
- Zero (to infinity)
 - Very high
 - High
 - Higher than the risk of death or serious injury from a firearm
 - Very low
12. True/ False Force decision must reasonably consider (as time and circumstances reasonable permit): Officers' reasonable perception of subject's actions or behaviors the officer is attempting to stop, thwart, or control and the foreseeable risks of injuries or harm to subject resulting from force to be use.
13. When considering the use of force, when reasonable:
- Use the minimum force necessary to accomplish lawful objectives
 - Use force only on those "actively resisting" or higher
 - Give a verbal warning before the use of force
 - All of the above
14. Experts have identified the following key factors related to CEW cardiac risks:
- Dart (or electrode)-to-heart ("DTH") distances
 - Amount of delivered electrical charge
 - Probe (or dart or electrode) anywhere on a person's body
 - A and B
15. The term (currently) used by TASER for describing the incapacitating effects of a CEW is:
- Electro-muscular disruption (EMD)
 - Neuro-muscular incapacitation (NMI)
 - Neuro-muscular disruption (NMD)
 - Electro-muscular incapacitation (EMI)
16. When using the CEW in Drive-Stun Mode:
- For maximum effectiveness, drive the CEW into certain pressure points
 - Use care when applying the drive stun to the neck or groin
 - Stay away from the trachea, the back of the neck and the genitals
 - All of the above

17. During CEW voluntary exposures which of the following are required safety rules?
- a) Always use two spotters when volunteer is standing
 - b) Spotters must hold volunteers closely under the armpit to stabilize the shoulder and upper arm and avoid twisting their shoulder
 - c) The volunteer should be safely supported and carefully lowered to the ground
 - d) All of the above
18. The handheld electronic weapons manufactured by TASER are referred to as:
- a) Electronic Control Weapons
 - b) Shock devices
 - c) Conducted Electrical Weapons
 - a) Conducted Energy Weapons
19. The standard CEW cycle if the trigger is pulled and released is:
- a) 10 seconds
 - b) 5 seconds
 - c) 4 seconds
 - d) The cycle always stops as soon as the trigger is released
20. A daily 5-second CEW spark/functionality test is recommended to:
- a) Ensure the CEW is sparking and functioning properly
 - b) Create muscle memory
 - c) Practice drawing and holstering the CEW
 - d) Teach proper CEW safety
21. TASER does not establish, recommend or endorse;
- a) Use of force procedures, policies, or general orders
 - b) Department policies, procedures, or general orders
 - c) Tactics
 - d) All of the above
22. Activated CEWs can ignite:
- a) Gasoline and gasoline vapors
 - b) Butane
 - c) Some personal defense sprays
 - d) Some hair sprays or gels
 - e) All of the above
23. A CEW application on a person can cause physiologic or metabolic effects, including, but not limited to, changes in:
- a) Blood Chemistry
 - b) Heart rate, and rhythm
 - c) Blood pressure
 - d) Respiration
 - e) Adrenaline and Stress hormones
 - f) Other effects
 - g) All of the above
24. Examples of persons who are at an elevated risk of secondary effects from a CEW exposure include:
- a) Running persons
 - b) Persons in elevated positions
 - c) Persons in a flammable environment
 - d) All of the above

25. When considering the use of force, when reasonable:
- a) Give subjects a reasonable opportunity to comply before force is used
 - b) Use pain compliance regardless if pain is reasonably foreseeably ineffective
 - c) Immediately cease any force once a subject has surrendered or is captured, handcuffed, and controlled
 - d) Continue to use force once a subject has surrendered or is captured, handcuffed, and controlled
 - e) a. & c
26. True/False When using a CEW avoid multiple, repeated, prolonged, extended, or continuous CEW exposures unless necessary to counter reasonably perceived threats(s) and it is justifiable.
27. If a person is not an immediate threat or flight risk:
- a) Do not immediately resort to CEW without first attempting to use negotiation, commands, or physical skills
 - b) Avoid using CEW on person who is actually or perceived to be mentally ill
 - c) Avoid using CEW on elevated risk population member, unless necessary and justifiable
 - d) All of the above
28. TASER does **NOT** require a CEW exposure for instructor or user certification.
- a) True
 - b) False
29. Evidence Sync is a free program offered by TASER International that allows agencies to:
- a) Access CEW firing data
 - b) Update firmware on CEWs
 - c) Assigning CEWs to individual users, etc. in conjunction with your agencies Evidence.com account
 - d) All of the above
30. True/False To avoid extended durations: Use the shortest duration of CEW exposure objectively reasonable to accomplish lawful objectives, and reassess the subject's behavior before initiating or continuing the exposure.

TASER® Conducted Electrical Weapons (CEWs) Part 2: X26P Certification Test

PRINT LEGIBLY AND CLEARLY PLEASE!

Name: PTL BOGGS #294 _____ New Certification / Recertification

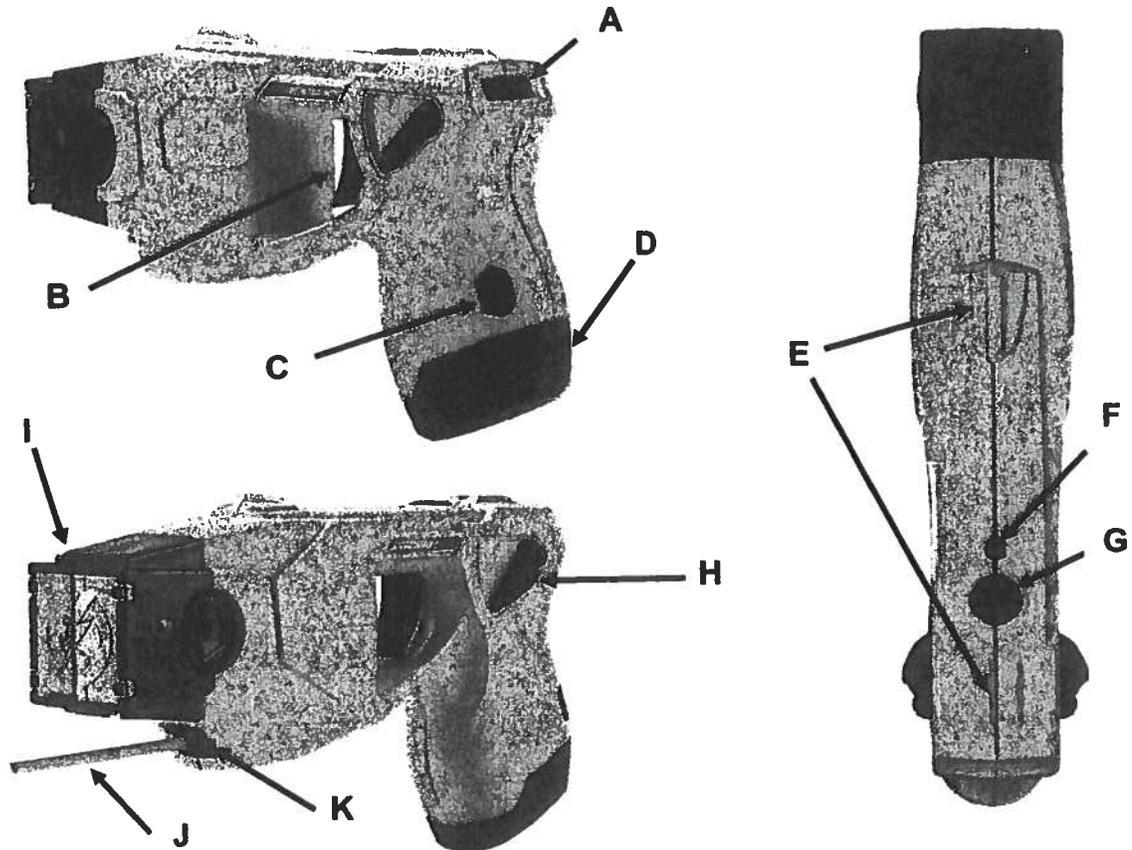

Agency: MANSFIELD POLICE DEPARTMENT _____

Training Date: 9-14-17 _____ Location: MANSFIELD POLICE DEPARTMENT _____

1. The X26P power source is called a Performance Power Magazine or PPM. There are several versions of the PPM available.
 a. True
 b. False
2. The Automatic-Shutdown Performance Power Magazine (APPM) automatically stops the TASER cycle after 5 seconds even if the trigger is held down.
 a. True
 b. False
3. When the X26P CID displays a Critical Fault icon, the X26P must be removed from service immediately and returned to TASER for repair.
 a. True
 b. False
4. The X26P constantly measures its output, pulse-by-pulse, to optimize the delivered charge and increase the likelihood of Neuro Muscular Incapacitation (NMI).
 a. True
 b. False
5. The Positive Safety Lock is designed to keep the safety switch on the X26P from being accidentally left on and draining the PPM.
 a. True
 b. False
6. When conducting a daily spark/functionality test, in addition to visually inspecting the arc you should:
 a. Check the CID for any fault icons
 b. Remove and reinsert the PPM
 c. None of the above
 d. All of the above

7. The program required to download the firing records from the X26P is called:
 - a. SkyNet
 - b. The X26P download software
 - c. EVIDENCE Sync
 - d. iTunes
8. The X26P uses TASER cartridges.
 - a. True
 - b. False
9. If an X26P has a PPM, TPPM, or TASER Cam (without auto-shutdown) for a power source, and the trigger is held down beyond the 5-second cycle, the X26P will continue to cycle until the trigger is released or the batteries drain.
 - a. True
 - b. False

[TASER Training Version 20]

TASER® CEW End-User Applicant Certification Form

PRINT LEGIBLY AND CLEARLY PLEASE!

Which CEWs were you certified on (Check all that apply): M26 X26 X26P X2 X3

Rank: OFFICER PTL Name: MAR BOGGS #294

Agency: MANFIELD POLICE DEPT Email: MBOGGS@CI.MANSFIELD, OH, US

Phone: 440 522-9428

Address/State/Zip: 30 N DIAMOND ST
MANFIELD OH 44903

New Certification: _____ Annual Recertification: _____

TASER Instructor Use Only

Instructor is required to verify that applicant has successfully completed all CEW User Certification/Recertification requirements.

Number of answers correct on written exam: 50 out of 50 for the X26, X26P, X2, and X3 (90% minimum)
out of 45 for the M26 (90% minimum)

- Review entire Version 20 End-Use Certification Course PowerPoint Presentation(s)
- Demonstrate safe handling of CEW and cartridges and proper finger positions for safe handling, aiming, and firing.
- Safely control TASER CEW adequately when commanded "Arm - Spark - Safe" at random.
- Demonstrate the ability to safely load and unload the TASER CEW under stress.
- N/A Remove and reinstall battery in TASER CEW correctly.
- Deploy a minimum of 2 live cartridges, placing both probes in preferred target zones.
- N/A (X2 and X3 only) Utilize the ARC switch to re-energize deployed probes and give a warning arc

I hereby certify that the above named applicant has satisfactorily completed all components of the TASER End-User Certification, or Annual Re-Certification, training program and is hereby certified as a user of this system for one year.

Instructor and User: Warnings, Risks & Release Agreement

medical care, surgical removal, or may result in scarring, infection, or other serious injury.

CEWs and cartridges are weapons, and as with any weapon follow safe weapon-handling practices and store your CEW securely. Significant differences exist between different TASER CEW models. Before using any CEW, including a multi-shot CEW, ensure you understand the functioning and effects of that model. Follow practices in TASER's warnings and training materials and any additional requirements in your agency's Guidance. Failure to follow the warnings may result in death or serious injury to the user or others.

Confusing Handgun with CEW. Confusing a handgun with a CEW could result in death or serious injury. Learn the differences in the physical feel and holstering characteristics between your CEW and your handgun to help avoid confusion. Always follow your agency's Guidance and training.

Trigger Hold-Back Model Differences. If the trigger is held back, most CEWs will continue to discharge until the trigger is released or the power source is expended. With an APPM installed, the X2 and X26P can be programmed to stop a CEW discharge at 5 seconds *even if the user continues to hold back the trigger*, requiring a deliberate action to re-energize the deployed cartridge. Know your model and how it works. Avoid repeated, prolonged, or continuous CEW applications when practicable.

Subject Not Incapacitated. An ineffective CEW application could increase the risk of death or serious injury to the user, the subject, or others. If a CEW does not operate as intended or if subject is not incapacitated, disengage, redeploy the CEW, or use other force options in accordance with agency Guidance. A CEW's effects may be limited by many factors, including absence of delivered electrical charge due to misses, clothing disconnect, intermittent connection, or wire breakage; probe locations or spread; subject's muscle mass; or movement. Some of the factors that may influence the effectiveness of CEW use in effecting or achieving control of a subject include:

Subject may not be fully incapacitated. Even though a subject may be affected by a CEW in one part of his body, the subject may maintain full muscle control of other portions of his body. Control and restrain a subject as soon as possible, and be prepared in case the subject is not fully incapacitated.

Subject may recover immediately. A subject receiving a CEW discharge may immediately regain physical or cognitive abilities upon cessation of the delivered CEW discharge. Control and restrain a subject as soon as possible, and be prepared in case the subject immediately recovers.

Drive-stun mode is for pain compliance only. The use of a handheld CEW in drive-stun mode is painful, but generally does not cause incapacitation. Drive-stun use may not be effective on emotionally disturbed persons or others who may not respond to pain due to a mind-body disconnect. Avoid using repeated drive-stuns on such individuals if compliance is not achieved.

Unintentional CEW Deployment or Discharge Hazard. Unintentional CEW activation or unexpected cartridge discharge could result in death or serious injury to the user, subject, or others.

Avoid static electricity. Keep cartridge away from sources of static electricity. Static electricity can cause a CEW or X26, X26P, or M26 cartridge to discharge unexpectedly, possibly resulting in serious injury.

Keep body parts away from front of CEW or cartridge. Always keep your hands and body parts away from the front of the CEW and cartridge. If the CEW discharges unexpectedly you could be injured.

IF YOU HAVE A CONDITION OR PRE-EXISTING INJURY THAT COULD BE AGGRAVATED BY TASER TRAINING OR CEW EXPOSURE, NOTIFY YOUR INSTRUCTOR AND DO NOT PARTICIPATE.

Please check all boxes that apply:

- I do not have injuries, physical or mental conditions that could be aggravated by TASER training or CEW exposure.
- I have pre-existing injuries or conditions that could be aggravated by TASER training or CEW exposure.
- I agree to participate in the training course but I do NOT volunteer or agree to be exposed to the electrical discharge of the CEW.

LIABILITY & RELEASE AGREEMENT

In consideration of, and as a condition precedent to, the use of TASER copyrighted training materials and participation in the training course; I acknowledge and agree as follows:

I have read, fully understand and accept the risks. I have read, fully understand, and accept the risks as stated in this document and TASER's current warnings ("Risks") and that these Risks exist whether or not I have pre-existing injuries. With full knowledge of the Risks, I voluntarily agree to participate in this TASER CEW training course.

TASER does not require a CEW Exposure. I understand that TASER does not require a CEW exposure as part of instructor or User training. It is up to each agency to determine whether its instructors and users experience a CEW exposure as part of training and it is exclusively my decision to voluntarily experience a CEW exposure.

I accept the Risks. Understanding the Risks, I assume all Risks inherent in CEW training and the CEW exposure (unless I opted out of the CEW exposure as indicated on this form), whether known or unknown, foreseen or unforeseen.

Release and hold harmless. I release and hold harmless TASER, its agents, officers, directors, employees, and distributors, my instructor, my law enforcement agency, and the host agency (collectively "Released Parties"), from any and all claims, including but not limited to, claims for strict liability, breach of warranty, failure to warn, or any other theory of liability whatsoever even if due to the NEGLIGENCE or GROSS NEGLIGENCE of the Released Parties. I specifically waive any statutory rights I may have regarding the release of unknown claims.

I agree no one will sue Released Parties. I promise that neither I nor anyone on my behalf will ever sue or bring any other legal action or claim against the Released Parties for anything related to my TASER CEW training.

Workers' Compensation Rights. This release does not waive any rights I may have under Workers' Compensation Laws. I agree that any recovery under Workers' Compensation Laws does not change, extend or enlarge the waivers and protections inherent in this agreement.

This agreement supersedes any other representation. This release supersedes any other statement, agreement or representation, written or oral, concerning my TASER CEW training (including any CEW exposure). I affirm that this is my entire agreement with TASER and I am not relying on any representation by my instructor or agency inconsistent with TASER's warnings and the Risks set forth in this document or in TASER's training materials.

This agreement is a binding contract. I intend this form to be legally binding upon me, my heirs, executors, administrators, attorneys and assigns. This agreement is contractual and not a mere recital. If any part of this agreement is held vague, invalid, or otherwise unenforceable, the rest of the agreement will continue in full force and effect.

I am competent to be bound by this agreement. I affirm that I am competent to enter into and be bound by this agreement; that I have read and understand this Liability & Release Agreement in its entirety; that I have not been induced to sign this agreement by any promise or representation; and that I sign it voluntarily and of my own free will. By signing below I understand that I am giving up certain legal rights, including the right to recover damages in case of injury.

Mansfield, Ohio Division of Police Response to Resistance/Aggression

Rules & Regulations:

- §1.51 - Officers shall carry firearms in accordance with law and established Division procedures.
- §1.55 - Employees shall not use more force in any situation than is reasonably necessary under the circumstances. Employees shall use force in accordance with law and Division procedures.
- §1.56 - Employees shall not use or handle weapons in a careless or imprudent manner. Employees shall use weapons in accordance with law and Division procedures.

Policy:

Officers, in performing their lawful duties, have a need to overcome physical resistance and therefore are authorized to use physical force, up to and including deadly force, to affect a lawful arrest and need not desist in their attempt merely because resistance is offered but must overcome the resistance to bring the arrestee under physical control. An officer is justified in using deadly force when he reasonably believes that the use of such force is necessary to prevent death or serious physical injury to himself or others including the suppression of riots in accordance with state law.

Response to Resistance/Aggression:

- A. Division employees will use only the minimum amount of force which is necessary and reasonable to control a situation, effect an arrest, overcome resistance to arrest or defend themselves from injury. No employee will use unreasonable or excessive force toward any person.
- B. When the Response to Resistance/Aggression is necessary, the degree of force that is employed should be in direct relationship to the amount of resistance employed by the person or the immediate threat the person poses to the employee or others.
- C. The Response to Resistance/Aggression by employees of the Division will, whenever possible, be progressive in nature. This force may be in the form of advice, warnings, persuasion, verbal encounters, physical contact, use of baton or other less-lethal weapons, or the use of deadly force.
- D. Deadly force is any force which carries a substantial risk that it will proximately result in the death of any person. The use of deadly force is justified under conditions of extreme necessity ONLY AS A LAST RESORT, when all lesser means have failed or cannot reasonably be employed and only under circumstances described below:
 - 1. Self-defense - To prevent death or immediate danger of serious physical injury to oneself.
 - 2. Defense of others - To prevent death or immediate danger of serious physical injury to others.
 - 3. Apprehension or Escape - To apprehend or prevent the escape of persons against whom the use of deadly force is authorized under (1.) or (2.) above, all lesser means have been reasonably exhausted and some warning has been given, if feasible.
 - 4. Suppression of riot - To protect persons or property during a riot when necessary to disperse or apprehend rioters when the use of deadly force is authorized in (1.) or (2.) above.

Prohibitions:

- A. Warning shots are prohibited.
- B. Firing at or from moving vehicles is prohibited except when all other reasonable means have failed and is authorized in [D.(1.), (2.) or (3.)] above.
- C. Carrying firearms or dangerous ordinance while under the influence of alcohol or drugs is prohibited except when authorized.
- D. Weapon-mounted flashlights are NOT to be used in a manner inconsistent with Division policy and will NOT replace the officer's handheld flashlight. A weapon-mounted light is a tool to be used as an aid during situations where the use of a firearm is warranted.

Firearms Safety: I will:

- A. Promote firearms safety through my own actions.
- B. Never draw firearms as a joke or jest.
- C. Regard all firearms as being loaded.
- D. Know and use the safety devices of all firearms with which I am armed.
- E. Never draw, point, direct or exhibit a firearm unless I intend to shoot.
- F. When possible or practicable, issue a verbal warning to the suspect before firing.
- G. First identify my target and insure a clear field of fire before discharging a weapon.
- H. Never arm myself with a weapon I am not fully qualified to use.
- I. Secure and store weapons in such a way as to prevent unauthorized access.
- J. Bear in mind at all times that my conduct in handling weapons is my own responsibility.

NOTE: See General Order 1.3 for a detailed explanation of the circumstances, restrictions, and additional considerations involving the Response to Resistance/Aggression, deadly force, firearm and reporting requirement.

I HAVE READ AND UNDERSTAND THE ABOVE POLICY PERTAINING TO FIREARMS SAFETY AND Response to Resistance/Aggression

Bloodborne Pathogens Quiz

100%

GOOD JOB

- 1) A bloodborne pathogen can be best defined as:
 - a. A bloodborne illness, similar in intensity to the common cold
 - b. Bacterial pathogens caused by spoiled or improperly cooked food
 - c. Microscopic organisms present in human blood which cause serious and often fatal disease in humans
 - d. Inherited disease pertaining to blood causing reduced circulation

- 2) The following are bloodborne pathogens:
 - a. Human Immunodeficiency Virus (HIV)
 - b. Salmonella
 - c. E-Coli
 - d. All of the above

- 3) Bloodborne pathogens can be transmitted:
 - a. Through sexual intercourse or intravenous drug use
 - b. By rubbing an eye after coming into contact with potentially infectious material
 - c. By potentially infectious materials coming into contact with inflamed acne or sunburn blisters
 - d. All of the above

- 4) Universal precautions require employees to:
 - a. Treat all liquids as if they are infected by HIV or other bloodborne pathogens
 - b. Treat all human blood and other bodily fluids as if they are infectious for bloodborne pathogens
 - c. Test all blood and unknown bodily fluids for HIV after spills
 - d. Label unknown liquids with hazard signs

- 5) One of the following is NOT an example of an engineering control:
 - a. Spill kits
 - b. Accessible hand washing stations
 - c. Proper decontamination of spill areas
 - d. Red hazardous waste bags

- 6) True or ~~False~~?
Use of Personal Protective Equipment, such as gloves or protective clothing guarantees elimination of exposure risk.

- 7) Employees should use PPE:
- a. Where there is reasonable anticipation of contact with blood or OPIM
 - b. During spill clean ups
 - c. When responding to an emergency
 - d. All of the above
- 8) If you're exposed to blood or other bodily fluids during an accident and it splashes on you, you should do all of the following, EXCEPT:
- a. Wash any exposed body part with running water or antibacterial soap
 - b. If affected, flush eyes or mucous membranes with running water for 15 minutes
 - c. Immediately clean up spill before it spreads
 - d. Report suspected exposure to supervisor
- 9) True or False? False?
HBV vaccination is mandatory regardless of your daily job responsibilities.
- 10) Contaminated clothing should be:
- a. Reused after a quick rinse
 - b. Used only after having been taken home and washed by the employee
 - c. Left in designated laundry container or receptacle
 - d. Put in normal trash

Name: PR BOGGS #204

Date: 3/20/19

Instructor and User:
Warnings, Risks & Release Agreement
(For Use with Any TASER CEW Training and TASER CEW Exposure)

increased when using a CEW in drive-stun mode. Increased skin irritation, abrasion, mark, burning, or scarring may occur with a CEW with multiple cartridge bays when used in drive-stun or three-point deployment modes.

Penetration Injury. The TASER probe has a small dart point which may cause a penetration injury to a blood vessel or internal organ, including lung, bone, or nerve. The probe or dart point (which may detach or break) can puncture or become embedded into a bone, organ, or tissue, which may require immediate medical care, surgical removal, or may result in scarring, infection, or other serious injury.

CEWs and cartridges are weapons, and as with any weapon, follow safe weapon-handling practices and store your CEW securely. Significant differences exist between different TASER CEW models. Before using any CEW, including a multi-shot CEW, ensure you understand the functioning and effects of that model. Follow practices in Axon's TASER warnings and training materials and any additional requirements in your agency's Guidance. Failure to follow the warnings may result in death or serious injury to the user or others.

Confusing Handgun with CEW. Confusing a handgun with a CEW could result in death or serious injury. Learn the differences in the physical feel and holstering characteristics between your CEW and your handgun to help avoid confusion. Always follow your agency's Guidance and training.

Trigger Hold-Back Model Differences. If the trigger is held back, most CEWs will continue to discharge until the trigger is released or the power source is expended. With an APPM installed, the X2 and X26P can be programmed to stop a CEW discharge at 5 seconds *even if the user continues to hold back the trigger*, requiring a deliberate action to re-energize the deployed cartridge. The TASER 7 offers similar options incorporated into the device (independent of the battery pack). Know your model and how it works. Avoid repeated, prolonged, or continuous CEW applications when practicable.

Subject Not Incapacitated. An ineffective CEW application could increase the risk of death or serious injury to the user, the subject, or others. If a CEW does not operate as intended or if subject is not incapacitated, disengage, redeploy the CEW, or use other force options in accordance with agency Guidance. A CEW's effects may be limited by many factors, including absence of delivered electrical charge due to misses, clothing disconnect, intermittent connection, or wire breakage; probe locations or spread; subject's muscle mass; or movement. Some of the factors that may influence the effectiveness of CEW use in effecting or achieving control of a subject include:

Subject may not be fully incapacitated. Even though a subject may be affected by a CEW in one part of his body, the subject may maintain full muscle control of other portions of his body. Control and restrain a subject as soon as possible, and be prepared in case the subject is not fully incapacitated.

Subject may recover immediately. A subject receiving a CEW discharge may immediately regain physical or cognitive abilities upon cessation of the delivered CEW discharge. Control and restrain a subject as soon as possible, and be prepared in case the subject immediately recovers.

Drive-stun mode is for pain compliance only. The use of a handheld CEW in drive-stun mode is painful, but generally does not cause incapacitation. Drive-stun use may not be effective on emotionally disturbed persons or others who may not respond to pain due to a mind-body disconnect. Avoid using repeated drive-stuns on such individuals if compliance is not achieved.

Unintentional CEW Deployment or Discharge Hazard. Unintentional CEW activation or unexpected cartridge discharge could result in death or serious injury to the user, subject, or others.

Avoid static electricity. Keep cartridge away from sources of static electricity. Static electricity can cause a CEW or X26, X26P, or M26 cartridge to discharge unexpectedly, possibly resulting in serious injury.

Keep body parts away from front of CEW or cartridge. Always keep your hands and body parts away from the front of the CEW and cartridge. If the CEW discharges unexpectedly you could be injured.

IF YOU HAVE A CONDITION OR PRE-EXISTING INJURY THAT COULD BE AGGRAVATED BY PARTICIPATING IN TASER TRAINING OR RECEIVING A TASER CEW EXPOSURE, NOTIFY YOUR INSTRUCTOR.

Please check the appropriate boxes:

- I am currently deemed fit for duty by my agency.
- I want to receive a voluntary TASER CEW exposure.
- I do NOT have any pre-existing injuries or conditions that could be aggravated by a voluntary exposure.
- I understand the risks associated with receiving a voluntary exposure and fully assume all risks.

LIABILITY RELEASE AGREEMENT

I acknowledge and agree as follows:

I have read, fully understand and accept the risks. I have read, fully understand, and accept the risks as stated in this document and Axon's current warnings ("Risks") and that these Risks exist whether or not I have pre-existing injuries. With full knowledge of the Risks, I voluntarily agree to participating in TASER CEW training.

Axon does not require a CEW Exposure. I understand that Axon does not require a CEW exposure as part of instructor or User training. It is up to each agency to determine whether its instructors and users experience a CEW exposure as part of training and it is exclusively my decision to voluntarily experience a CEW exposure.

I accept the Risks. Understanding the Risks, I assume all Risks inherent in TASER CEW training and, if applicable, voluntary CEW exposures, whether known or unknown, foreseen or unforeseen.

Release and hold harmless. I release and hold harmless Axon, its agents, officers, directors, employees, and distributors; my instructor, my law enforcement agency, and the host agency (collectively "Released Parties"), from any and all claims, including but not limited to, claims for strict liability, breach of warranty, failure to warn, or any other theory of liability whatsoever even if due to the NEGLIGENCE or GROSS NEGLIGENCE of the Released Parties. I specifically waive any statutory rights I may have regarding the release of unknown claims.

I agree no one will sue Released Parties. I promise that neither I nor anyone on my behalf will ever sue or bring any other legal action or claim against the Released Parties for anything related to my TASER CEW training or, if applicable, voluntary exposure.

Workers' Compensation Rights. This release does not waive any rights I may have under Workers' Compensation Laws. I agree that any recovery under Workers' Compensation Laws does not change, extend or enlarge the waivers and protections inherent in this agreement.

This agreement supersedes any other representation. This release supersedes any other statement, agreement or representation, written or oral, concerning my TASER CEW training and/or exposure. I affirm that this is my entire agreement with Axon and I am not relying on any representation by my instructor or agency inconsistent with Axon's TASER warnings and the Risks set forth in this document or in Axon's TASER training materials.

This agreement is a binding contract. I intend this form be legally binding upon me, my heirs, executors, administrators, attorneys and assigns. This agreement is contractual and not a mere recital. If any part of this agreement is held vague, invalid, or otherwise unenforceable, the rest of the agreement will continue in full force and effect.

I am competent to be bound by this agreement. I affirm that I am competent to enter into and be bound by this agreement; that I have read and understand this Liability Release Agreement in its entirety; that I have not been induced to sign this agreement by any promise or representation; and that I sign it voluntarily and of my own free will. By signing below I understand that I am giving up certain legal rights, including the right to recover damages in case of injury.

Date 11/4/20 Signed [Signature]

Printed Name MARV BOGGS

Agency MANSTFELD POLICE DEPT

This signed, completed form shall be retained by the agency or employer for the duration of the student's employment or longer as deemed necessary. Questions should be directed to legal@axon.com

Instructor and User: Warnings, Risks & Release Agreement (For Use with Any TASER CEW Training and TASER CEW Exposure)

Axon Enterprise, Inc. (Axon) TASER conducted energy weapon (CEW) training courses are physically strenuous and there is a risk of personal injury. **BEFORE participating in any TASER CEW training or voluntary exposure, each participant MUST read the most current TASER CEW warnings and read and sign this form.** This document incorporates all current TASER CEW warnings by reference. This document is effective **December 20, 2018**, and supersedes all prior revisions.

Read, understand, and follow all current instructions, warnings, and relevant TASER training materials before participating in TASER CEW training or experiencing a CEW exposure. Failure to do so could increase the risk of death or serious injury to the trainee, user, force recipient, instructor, participants or others. Always follow all current instructions, warnings, and TASER training materials to minimize CEW risks.

Voluntary. Axon does not require a CEW exposure as a condition for Instructor or User Certification. It is up to each agency to determine whether its instructors and users experience a CEW exposure as part of training. If CEW exposures are performed, they must be limited to a single exposure not exceeding 5 seconds and performed in accordance with Axon's guidelines and by a Certified TASER Instructor.¹ **Probe Deployments to Back Only.** Cartridge deployed probes must be to the back of the torso or back of the legs only.

Spotters. All persons taking a CEW exposure must be properly supported by spotters to prevent falls unless lying down on a mat. Each spotter must hold the person and support the arm under the armpit to prevent arm or shoulder injuries.

Eye Protection. Eye protection is required for the CEW operator, observers, spotters and the person being exposed to any probe deployment during ALL times.

Muscle Contraction or Strain-Related Injury. CEWs in probe-deployment mode can cause muscle contractions that may result in injury, including bone fractures. CEWs in probe-deployment mode can cause muscle contractions resulting in injuries similar to those from physical exertion, athletics, or sports, including hernia rupture, dislocation, tear, or other injury to soft tissue, organ, muscle, tendon, ligament, cartilage, disc, nerve, bone, or joint; or injury or damage associated with or to orthopedic or other hardware. Fractures to bone, including compression fracture to vertebrae, may occur. These injuries may be more serious and more likely to occur in people with pre-existing injuries, orthopedic hardware, conditions or special susceptibilities, including pregnancy; low bone density; spinal injury; or previous muscle, disc, ligament, joint, bone, or tendon damage or surgery. Such injuries may also occur in drive-stun applications or when a person reacts to the CEW deployment by making a rapid or unexpected movement.

Secondary Injury. The loss of control resulting from a CEW exposure may result in injuries due to a fall or other uncontrolled movement. When possible, avoid using a CEW when secondary injuries are likely.

Seizure. Repetitive stimuli (e.g., flashing light or electrical stimuli) can induce seizure in some people, which may result in death or serious injury. This risk may be increased in a person with epilepsy, a seizure history, or if electrical stimuli pass through the head. Emotional stress and physical exertion, both likely in incidents involving CEW and other uses of force, are reported as seizure-precipitating factors.

Fainting. A person may experience an exaggerated response to a CEW exposure, or threatened exposure, which may result in fainting or falling.

Muscle contraction, incapacitation, or startle response. CEW use may cause loss of control from muscle contraction, incapacitation, or startle response.

Cumulative Effects. CEW exposure causes certain effects, including physiologic and metabolic changes, stress, and pain. In some individuals, the risk of death or serious injury may increase with cumulative CEW exposure. Repeated, prolonged, or continuous CEW applications may contribute to cumulative exhaustion, stress, cardiac, physiologic, metabolic, respiratory, and associated medical risks which could increase the risk of death or serious injury. Minimize repeated, continuous, or simultaneous exposures.

Physiologic and Metabolic Effects. CEW use causes physiologic and/or metabolic effects that may increase the risk of death or serious injury. These effects include changes in blood chemistry, blood pressure, respiration, heart rate and rhythm, and adrenaline and stress hormones, among others. In human studies of electrical discharge from a single CEW of up to 15 seconds, the effects on acid/base balance creatine kinase, electrolytes, stress hormones, and vital signs were comparable to less than changes expected from physical exertion similar to struggling, resistance, fighting, fleeing, or from the application of some other force tools or techniques. Some individuals may be particularly susceptible to the effects of CEW use. These susceptible individuals include the elderly, those with heart conditions, asthma or other pulmonary conditions, and people suffering from excited delirium, profound agitation, severe exhaustion, drug intoxication or chronic drug abuse, and/or over-exertion from physical struggle. In a physiologically or metabolically compromised person, any physiologic or metabolic change may cause or contribute to sudden death.

Stress and Pain. CEW use, anticipation of use, or response to use can cause startle panic, fear, anger, rage, temporary discomfort, pain, or stress which may be injurious or fatal to some people.

Minimize the number and duration of CEW exposures. Most human CEW lab testing has not exceeded 15 seconds of CEW application, and none has exceeded 4 seconds. Use the shortest duration of CEW exposure objectively reasonable to accomplish lawful objectives, and reassess the subject's behavior, reaction, and resistance before initiating or continuing the exposure. If a CEW deployment is ineffective in incapacitating a subject or achieving compliance, consider alternative control measures in conjunction with or separate from the CEW.

Avoid simultaneous CEW exposures. Do not use multiple CEWs or multiple completed circuits at the same time without justification. Multiple CEWs or multiple completed circuits at the same time could have cumulative effects and result in increased risks.

Control and restrain immediately. Begin control and restraint procedures, including during CEW exposure (cuffing under power), as soon as reasonably safe and practical to minimize CEW cumulative effects and the total duration of exertion and stress experienced by the subject.

Avoid touching probes/wires during CEW discharge. Controlling and restraining subject during CEW exposure may put the CEW user and those assisting at risk of accidental or unintended shock. Avoid touching the probes and wires and the areas between the probes during the electrical discharge.

Cardiac Capture. CEW exposure in the chest area near the heart has a low probability of inducing extra heart beats (cardiac capture). In rare circumstances cardiac capture could lead to cardiac arrest. When possible, avoid targeting the front chest area near the heart to reduce the risk of potential serious injury or death. Cardiac capture may be more likely in children and thin adults because the heart is usually closer to the CEW-delivered discharge (the dart-to-heart distance). Serious complications could also arise in those with impaired heart function or in those with implanted cardiac pacemaker or defibrillator.

Use preferred target areas. The preferred target areas are below the neck area for back shots and the lower center mass (below chest) for front shots. The preferred target areas increase dart-to-heart distance and reduce cardiac risks. Back shots are preferable to front shots when practicable.

Avoid sensitive areas. When practicable, avoid intentionally targeting the CEW sensitive areas of the body such as the face, eyes, head, throat, chest area (area of heart), breast, groin, genitals, or known pre-existing injury areas.

Eye Injury Hazard. A TASER probe, electrode, or electrical discharge that contacts or comes close to an eye can result in serious injury, including permanent vision loss. DO NOT intentionally aim a CEW, including the LASER, at the eye of a person or animal without justification.

Probe or Electrode Injury, Puncture, Scarring, or Infection Hazard. CEW use may cause a permanent mark, burn, scar, puncture, or other skin or tissue damage. Infection could result in death or serious injury. Scarring risk may be

¹ A Certified TASER Instructor is not an Axon agent, but maintains a current TASER instructor certification and

complies with Axon's most current training requirements, materials and license agreement. Representations inconsistent with this document made by any Certified TASER Instructor are expressly disclaimed.

GOOD JOB!

Version 22

**TASER® Conducted Energy Weapons (CEWs)
Part 1: User Certification Test**

Name: MARK BOGGS #294 New Certification / Recertification

Agency: MANSFIELD P.D.

Training Date: 1/29/21 Location: MANSFIELD PD - 30 N. DIAMOND ST.

1. The Nervous System consists of the following:
 - a) Central Nervous System - Command Center (brain and spinal cord)
 - b) Motor Nervous System - Carries commands from the brain to muscles (NMI systems affect BOTH the Sensory and Motor Nerves)
 - c) Sensory Nervous System - Brings information into the brain (affected by stun systems)
 - d) All of the above

2. In considering the use of a CEW:
 - a) Do not use for verbal defiance
 - b) Do not use for belligerence
 - c) Do not use for punishment
 - d) Do not use for horse play
 - e) All of the above

3. The preferred target areas for CEW exposure are:
 - a) Lower center mass (below chest or area of the heart) and legs for front exposure
 - b) Below the neck area for back exposures
 - c) Anywhere on the person's body
 - d) a and b
 - e) a and b (with the back being the most preferred area)

4. As with any use of force, the longer the CEW exposure the greater the risk of potential cumulative physiologic, metabolic, and other effects.
 - a) True
 - b) False

5. The officer should avoid intentionally targeting the CEW on sensitive areas of the body such as the head, throat, breast, chest (area of the heart), genitals, or known pre-existing injury areas without legal justification.
 - a) True
 - b) False

6. Probe deployments are more desirable/effective than drive stuns (other than 3-point deployments).
 - a) True
 - b) False

7. The further a CEW exposure is away from the heart and the fewer CEW cycles applied the greater the safety margin for the CEW affecting the heart.
 - a) True
 - b) False

8. Controlling/Cuffing under power during the "window of opportunity" can reduce the need for repeated or extended CEW exposures.
- a) True
 - b) False
9. TASER CEWs are serious weapons and are to be treated as such at all times.
- a) True
 - b) False
10. When deploying probes to the front of a person's body, the CEW should generally be aimed:
- a) At the face
 - b) At the chest or area of the heart
 - c) At the waist area to split the beltline
 - d) At the throat
 - e) At the head
11. The risk of a CEW causing or contributing to a person's cardiac arrest is:
- a) Zero
 - b) Very high
 - c) High
 - d) Higher than the risk of death or serious injury from a firearm
 - e) Very low
12. An officer's use of force must be objectively reasonable under the totality of circumstances as reasonably perceived by the officer at the moment the force is used.
- a) True
 - b) False
13. When reasonable, Smart Use Considerations include:
- a) Use the minimum force necessary to accomplish lawful objectives
 - b) Use force only on those "actively resisting" or higher
 - c) Give a verbal warning before the use of force
 - d) Give subjects a reasonable opportunity to comply before force is used or repeated
 - e) Immediately cease any force once a subject is under control
 - f) All of the above
14. Experts have identified the following key factors related to CEW cardiac risks:
- a) Dart-to-heart distances
 - b) Amount of delivered electrical charge
 - c) Dart anywhere on a person's body
 - d) A and B
15. The term currently used by TASER Training to describe the incapacitating effects of a CEW is:
- a) Electro-muscular disruption (EMD)
 - b) Neuro-muscular incapacitation (NMI)
 - c) Neuro-muscular disruption (NMD)
 - d) Electro-muscular incapacitation (EMI)
16. When using the CEW in Drive-Stun Mode:
- a) Follow agency policy
 - b) Use care when applying the drive stun to the neck or groin
 - c) Stay away from the trachea, the back of the neck, and the genitals
 - d) All of the above

17. During CEW voluntary exposures which of the following are required safety rules?
- a) Always use two spotters when volunteer is standing
 - b) Spotters must hold volunteers closely under the armpit to stabilize the shoulder and upper arm
 - c) The volunteer should be safely supported and carefully lowered to the ground
 - d) All of the above
18. The handheld electronic weapons manufactured by Axon (formerly TASER) are referred to as:
- a) Electronic Control Weapons
 - b) Shock devices
 - c) Conducted Energy Weapons
 - d) Conducted Energy Devices
19. A single CEW trigger pull and release discharges an electrical charge for a:
- a) 10 second cycle
 - b) 5 second cycle
 - c) 4 second cycle
 - d) The cycle always stops as soon as the trigger is released
20. A pre-shift 5-second CEW spark/functionality test is recommended to:
- a) Ensure the CEW is sparking and functioning properly
 - b) Create muscle memory
 - c) Practice drawing and holstering the CEW
 - d) Teach proper CEW safety
21. TASER Training does not set use-of-force policies, general orders, or procedures
- a) True
 - b) False
22. Activated CEWs can ignite:
- a) Gasoline and gasoline vapors
 - b) Butane
 - c) Some personal defense sprays
 - d) Some hair sprays or gels
 - e) All of the above
23. A CEW application on a person can cause physiologic or metabolic effects, including, but not limited to, changes in:
- a) Blood Chemistry
 - b) Heart rate, and rhythm
 - c) Blood pressure
 - d) Respiration
 - e) Adrenaline and Stress hormones
 - f) All of the above

24. Some examples of persons who are at an elevated risk of secondary effects from a CEW exposure include:
- a) Running persons
 - b) Persons in elevated positions
 - c) Persons in a flammable environment
 - d) All of the above
25. When considering the use of force, when reasonable:
- a) Give subjects a reasonable opportunity to comply before force is used or repeated
 - b) Use pain compliance even if pain is reasonably foreseeably ineffective
 - c) Immediately cease any force once a subject is under control
 - d) Continue to use force once a subject has surrendered or is captured, handcuffed, and controlled
 - e) A & C
26. An officer should avoid repeated or continuous CEW exposures unless necessary to counter immediate threat
- a) True
 - b) False
27. Post CEW use, as with all force options, officers should monitor the subject and initiate EMS/CPR protocol if subject becomes unresponsive.
- a) True
 - b) False
28. TASER does **NOT** require a CEW exposure for instructor or user certification.
- a) True
 - b) False
29. Axon Evidence (Evidence.com) is a program offered by Axon that allows agencies:
- a) Access CEW firing records
 - b) Cloud storage solution
 - c) Assign CEWs to individual users
 - d) All of the above
30. Use the shortest duration of CEW exposure objectively reasonable to accomplish lawful objectives and reassess the subject's behavior before repeating or continuing the exposure.
- a) True
 - b) False

Version 22

**TASER® Conducted Energy Weapons (CEWs)
Part 2: TASER 7 Certification Test**

Name: MARK BOGGS #294 New Certification / Recertification

Agency: MANSFIELD P.D.

Training Date: 1/29/21 Location: MANSFIELD P.D. - 30 N. DIAMOND ST.

1. The Arc switch cannot be used to:
 - A. Initiate the warning arc
 - B. Toggle between cartridges
 - C. Re-energize deployed cartridges
 - D. All of the above

2. A warning arc can be displayed on the Taser 7 without discharging loaded cartridges.
 - A. True
 - B. False

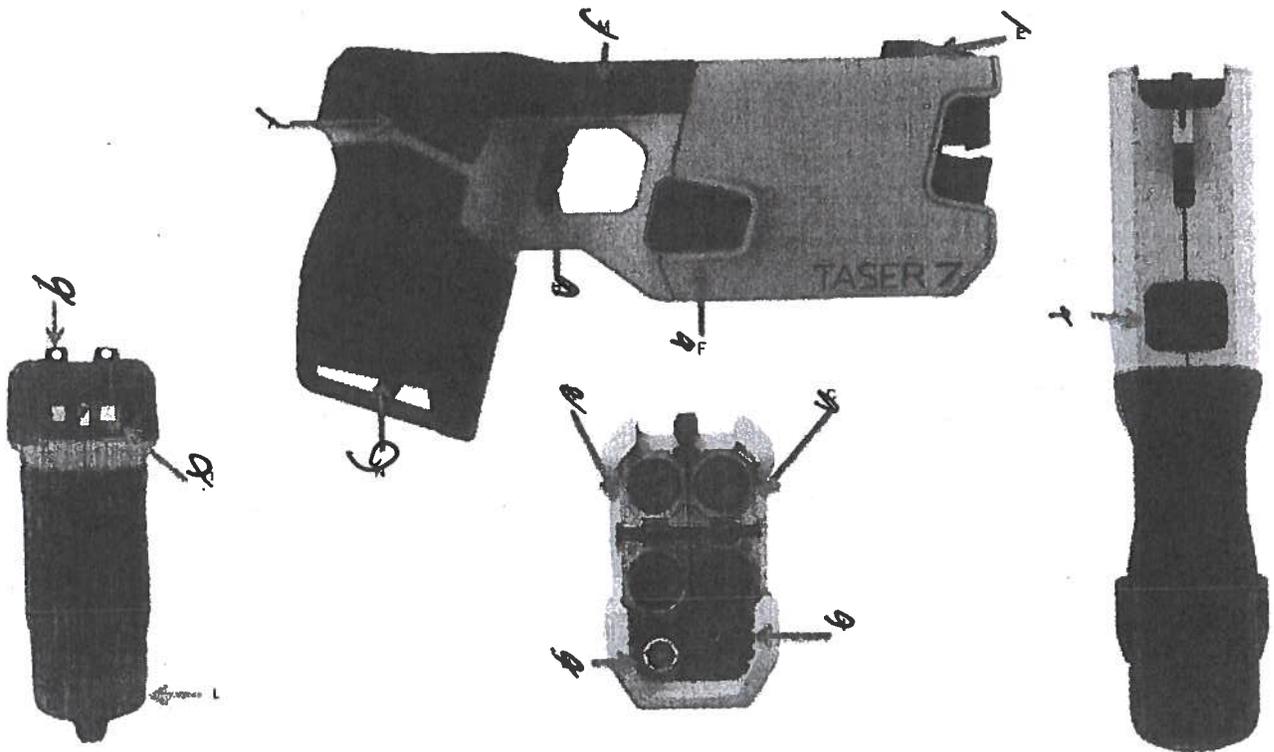

3. If selected in Axon Evidence (Evidence.com), the Automatic-Shutdown mode will automatically stop the TASER cycle after 5 seconds even if the trigger is held down.
 - A. True
 - B. False

4. Axon recommends docking the rechargeable battery pack every 30 days.
 - A. True
 - B. False

5. Pressing the trigger after Bay #1 has been deployed will automatically deploy the next available cartridge in the weapon and activate Bay #1.
 - A. True
 - B. False

6. When both cartridges are deployed, the Taser 7 will sense a missed connection and will distribute the charge between the working connections.
 - A. True
 - B. False

Bloodborne Pathogens Quiz

- 1) A bloodborne pathogen can be best defined as:
 - a. A bloodborne illness, similar in intensity to the common cold
 - b. Bacterial pathogens caused by spoiled or improperly cooked food
 - c. Microscopic organisms present in human blood which cause serious and often fatal disease in humans
 - d. Inherited disease pertaining to blood causing reduced circulation

- 2) The following are bloodborne pathogens:
 - a. Human Immunodeficiency Virus (HIV)
 - b. Salmonella
 - c. E-Coli
 - d. All of the above

- 3) Bloodborne pathogens can be transmitted:
 - a. Through sexual intercourse or intravenous drug use
 - b. By rubbing an eye after coming into contact with potentially infectious material
 - c. By potentially infectious materials coming into contact with inflamed acne or sunburn blisters
 - d. All of the above

- 4) Universal precautions require employees to:
 - a. Treat all liquids as if they are infected by HIV or other bloodborne pathogens
 - b. Treat all human blood and other bodily fluids as if they are infectious for bloodborne pathogens
 - c. Test all blood and unknown bodily fluids for HIV after spills
 - d. Label unknown liquids with hazard signs

- 5) One of the following is NOT an example of an engineering control:
 - a. Spill kits
 - b. Accessible hand washing stations
 - c. Proper decontamination of spill areas
 - d. Red hazardous waste bags

- 6) True or False?
Use of Personal Protective Equipment, such as gloves or protective clothing guarantees elimination of exposure risk.

- 7) Employees should use PPE:
- a. Where there is reasonable anticipation of contact with blood or OPIM
 - b. During spill clean ups
 - c. When responding to an emergency
 - d. All of the above
- 8) If you're exposed to blood or other bodily fluids during an accident and it splashes on you, you should do all of the following, EXCEPT:
- a. Wash any exposed body part with running water or antibacterial soap
 - b. If affected, flush eyes or mucous membranes with running water for 15 minutes
 - c. Immediately clean up spill before it spreads
 - d. Report suspected exposure to supervisor
- 9) True or False?
HBV vaccination is mandatory regardless of your daily job responsibilities.
- 10) Contaminated clothing should be:
- a. Reused after a quick rinse
 - b. Used only after having been taken home and washed by the employee
 - c. Left in designated laundry container or receptacle
 - d. Put in normal trash

MIKE DEWINE
 ★ OHIO ATTORNEY GENERAL ★

Policing in the 21st Century Course Handout

Constitutional Use of Force

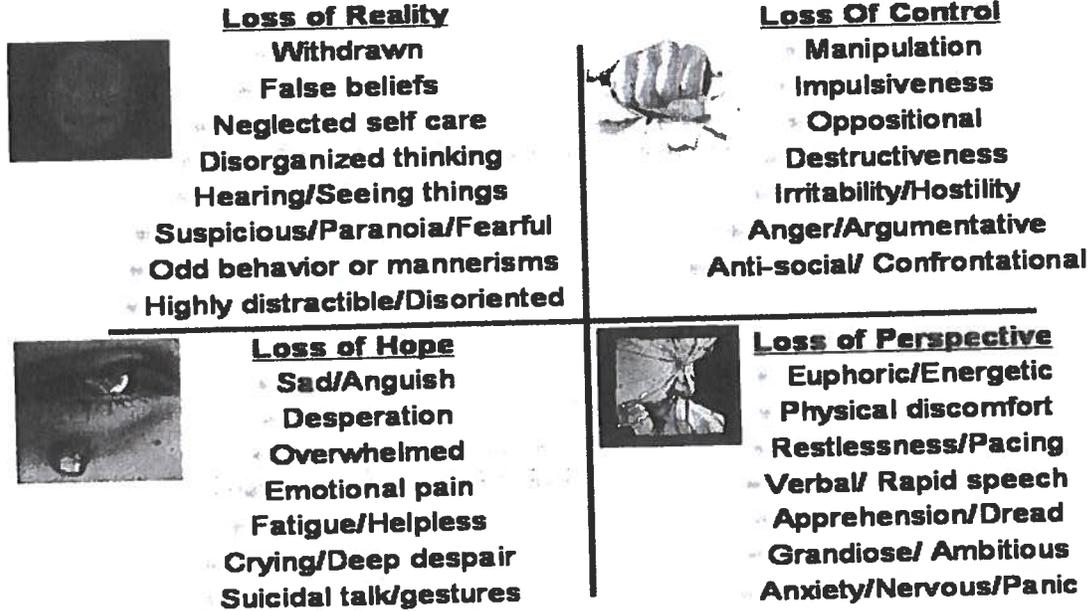

1. 4th Amendment prohibits "UNREASONABLE SEARCH AND SEIZURE" and applies to seized persons (i.e., those arrested or otherwise detained by law enforcement officers)
 - a. The U.S. Supreme Court defined a seizure of a person as a "governmental termination of freedom of movement through means intentionally applied" (Brower v. Cnty. of Inyo, 1989)
 - b. "Force" means any violence, compulsion, or constraint physically exerted by any means upon or against a person or thing (R.C. 2901.01)
 - c. "Deadly force" means any force that carries a substantial risk that it will proximately result in the death of any person (R.C. 2901.01)
2. **Graham v. Connor (1989)** – established the OBJECTIVELY USE OF FORCE REASONABLE standard
 - a. The Court defined the issue as follows: "...whether the officer's actions are **objectively reasonable** in light of the facts and circumstances confronting them...judged from the perspective of a reasonable officer on the scene, rather than with the 20/20 vision of hindsight... Not every push or shove, even if it may later seem unnecessary in the peace of the judge's chambers, violates the Fourth Amendment"

<ul style="list-style-type: none"> • Established relevant factors when evaluating an officer's use of force <ul style="list-style-type: none"> ○ Severity of the crime ○ Immediate <u>THREAT</u> ○ <u>ACTIVELY</u> resisting ○ Evade by flight 	<ul style="list-style-type: none"> • Additional concepts that help determine reasonableness <ul style="list-style-type: none"> ○ Perspective of a reasonable officer on the scene ○ Totality of the circumstances ○ Officer/subject factors ○ Pre-<u>FLIGHT</u> indicators ○ Action vs. <u>REACTION</u>
--	--
3. **Tennessee v. Garner (1985)**
 - a. Apprehension by the use of DEADLY FORCE is a seizure subject to the Fourth Amendment's REASONABLE requirement
 - b. The U.S. Supreme Court determined in Tennessee v. Garner (1985) that the Fourth Amendment permits law enforcement officers to use deadly force to achieve seizures in two general contexts:
 - (1) To protect themselves or others from immediate threats of serious physical injury; and/or
 - (2) To prevent escape of a fleeing "dangerous" person

Implicit Association Test (IAT)

To see what implicit biases you may have there is an online test(s) you can take. These are developed by Project Implicit which is a non-profit organization and international collaboration between researchers.

The tests measure response times that are designed to reveal the strength of automatic associations you have between concepts, evaluations, and stereotypes. We encourage every officer to take these tests for themselves. Taking the tests is very simple. All you need is internet access on a computer with a keyboard and you can take them free of charge.

The tests can be found at <https://implicit.harvard.edu/implicit/takeatest.html> or you can simply web search implicit bias test to get there. Once you are on the site click at the bottom where it says you want to proceed. You will then be able to select the type of test you want to take. There are tests for biases in many categories including race, age, sexism, etc... Simply select the bias you want to test for and follow the prompts. As you can see you will have to look at pictures on the screen and select the category that picture best fits as quickly as possible. At the conclusion of the test you will be shown your results. You will also be provided links you can follow to ask additional questions should you have any.

Procedural Justice - Procedures and tactics used by police officers where citizens are treated fairly and with proper respect.

TWO PRONGED APPROACH; PERSON-BASED AND COMMUNITY BASED. POLICE MUST BUILD UP TRUST BY COURTESY, KINDNESS AND HONESTY. BENEFITS; PEOPLE WILL COMPLY LESS LIKELY FOR VIOLENCE.

Implicit Bias - Preference for a social category based on stereotypes or attitudes we hold that operate outside of our awareness.

BIAS DO NOT NECESSARILY ALIGN W/OUR EXPLICIT BIAS. MAY IMPACT OUR EFFORTS TO USE PROCEDURAL JUSTICE. THEY CAN RELATE TO RACE, RELIGION, GENDER, SEX, DISABILITY, HEIGHT, WEIGHT

PR-24 Side Handle Baton User Certification Test

Name: M BOGGS # 294

Date: 12-7-16

1. If a subject grabs the short portion of your baton from the front, you should:
 - a. Call for assistance
 - b. Yank the short handle from the subjects hands while striking his forearm with your weak hand
 - c. Say; Let GO!
 - d. Take no action
 - e. None of the above

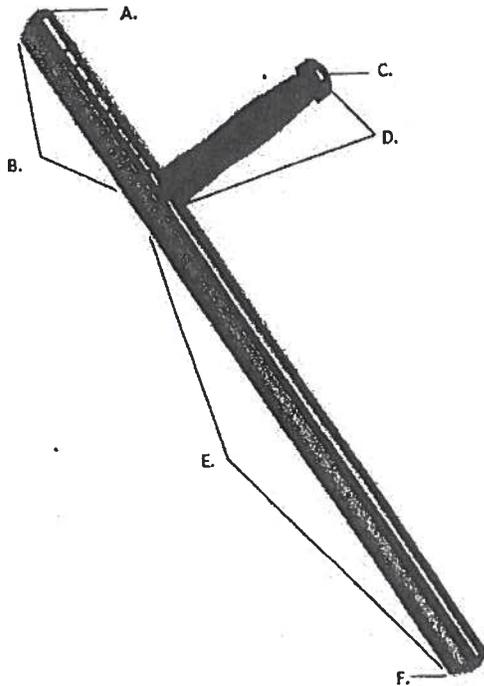

2. The three methods of carrying the baton are:
 - a. Horizontal, Vertical and Two handed
 - b. Weak side, Strong side and Concealed
 - c. Riot mode, Defense mode and Attack mode
 - d. Trunk, Briefcase and Tether
 - e. Right handed, Left handed and On the belt

3. The _____ is considered a "No Strike" zone unless deadly force is justified:
 - a. Head
 - b. Throat
 - c. Solar Plexus
 - d. Temple
 - e. All of the above

4. When using a one handed high block, it is prudent to keep the _____ away from your head.
 - a. Riot Shield
 - b. Long Extended End
 - c. Short End
 - d. Knob
 - e. Sun

5. Soap and Water should be used to clean a PR-24 Side Handle Baton.
 - a. True
 - b. False

PR-24 Side Handle Baton User Certification Test

6. Match the letter from the above diagram to the corresponding description:

B	Short End
B	Short Portion
D	Short Handle
C	Knob
F	Long Extended Portion
F	Long Extended End

CTS OC USER CERTIFICATION TEST

SCORE: _____

Name: MARK BOGGS Date: 0 11-29-16

1. Oleoresin Capsicum (OC) is derived from: _____
 - A. Petroleum Products
 - B. Cultivated Plants
 - C. Chemical Agents
 - D. Synthetic Products
2. The International color code for OC is: _____
 - A. Red
 - B. Blue
 - C. Orange
 - D. None
3. The Minimum safe distance for dispensing OC is: _____
 - A. 6 inches
 - B. 2 feet
 - C. 3 feet
 - D. 6 feet
 - E. None of the above
4. The maximum effective distance for dispensing OC is: _____
 - A. 8 feet
 - B. 6-10 feet
 - C. 12-15 feet
 - D. 15-20 feet
5. CTS is target specific: _____
 - A. True
 - B. False
6. When dispensing OC on an individual, the point of aim should be: _____
 - A. Center of chest
 - B. Chin

- C. Forehead
D. Across the shoulders
7. An officer should always use his/her gun hand to dispense OC.
A. True
 B. False
8. Oleoresin Capsicum is classified as a: _____
A. Irritant
 B. Inflammatory
C. Lacrimator
D. Chemical Agent
E. None of the above.
9. The "First" step to be taken in the decontamination process of an individual should be: _____
A. Restrict the contaminated person's activities
B. Flush contaminated areas of the body with water
 C. Remove the person from the contaminated area to fresh air.
D. Reassure the person that the effects will soon pass.
E. All of the above.
10. To ease the burning sensation and speed the decontamination _____ may be applied to the affected areas of the individuals body>
A. Salves
B. Creams
C. Hot Towels
 D. Water
E. All of the above.

I certify that I have been trained and demonstrated proficiency in the dispensing, effects, and decontamination for CTS OC Aerosol.

Bloodborne Pathogens Quiz

100%
RIGHT

- 1) A bloodborne pathogen can be best defined as:
 - a. A bloodborne illness, similar in intensity to the common cold
 - b. Bacterial pathogens caused by spoiled or improperly cooked food
 - c. Microscopic organisms present in human blood which cause serious and often fatal disease in humans
 - d. Inherited disease pertaining to blood causing reduced circulation

- 2) The following are bloodborne pathogens:
 - a. Human Immunodeficiency Virus (HIV)
 - b. Salmonella
 - c. E-Coli
 - d. All of the above

- 3) Bloodborne pathogens can be transmitted:
 - a. Through sexual intercourse or intravenous drug use
 - b. By rubbing an eye after coming into contact with potentially infectious material
 - c. By potentially infectious materials coming into contact with inflamed acne or sunburn blisters
 - d. All of the above

- 4) Universal precautions require employees to:
 - a. Treat all liquids as if they are infected by HIV or other bloodborne pathogens
 - b. Treat all human blood and other bodily fluids as if they are infectious for bloodborne pathogens
 - c. Test all blood and unknown bodily fluids for HIV after spills
 - d. Label unknown liquids with hazard signs

- 5) One of the following is NOT an example of an engineering control:
 - a. Spill kits
 - b. Accessible hand washing stations
 - c. Proper decontamination of spill areas
 - d. Red hazardous waste bags

- 6) True or False?
 True
Use of Personal Protective Equipment, such as gloves or protective clothing guarantees elimination of exposure risk.

- 7) Employees should use PPE:
- a. Where there is reasonable anticipation of contact with blood or OPIM
 - b. During spill clean ups
 - c. When responding to an emergency
 - d. All of the above
- 8) If you're exposed to blood or other bodily fluids during an accident and it splashes on you, you should do all of the following, EXCEPT:
- a. Wash any exposed body part with running water or antibacterial soap
 - b. If affected, flush eyes or mucous membranes with running water for 15 minutes
 - c. Immediately clean up spill before it spreads
 - d. Report suspected exposure to supervisor
- 9) True or ~~False~~?
HBV vaccination is mandatory regardless of your daily job responsibilities.
- 10) Contaminated clothing should be:
- a. Reused after a quick rinse
 - b. Used only after having been taken home and washed by the employee
 - c. Left in designated laundry container or receptacle
 - d. Put in normal trash

MONADNOCK PR-24 ADVANCED COURSE WRITTEN TEST

Student's Name: M BOGGS # 294 Date: 12-7-16

Answer the following questions by matching the technique or part to the letter that most correctly represents that technique or part of a Monadnock PR-24 police baton.

- | | |
|--------------------------|------------|
| 1. Short End | <u>B A</u> |
| 2. Long Extended Jab | <u>E</u> |
| 3. Knob | <u>C</u> |
| 4. Front Jab | <u>A</u> |
| 5. Short Handle | <u>D</u> |
| 6. Forward Spin | <u>F</u> |
| 7. Long Extended End | <u>E</u> |
| 8. Upper Chop | <u>B</u> |
| 9. Long Extended Portion | <u>J</u> |
| 10. Short Portion | <u>B</u> |
| 11. Rear Jab | <u>E</u> |
| 12. Power Spin | <u>F</u> |
| 13. Short Handle Jab | <u>C</u> |
| 14. Flat Chop | <u>I</u> |

15. If a subject grabs the short portion of your PR-24 baton from the front, what should you immediately do?
- Call for assistance
 - Yank the short handle out from the subject's hand(s) while striking his/her forearm with your weak hand
 - Say: "Let Go!"
 - Take no action
 - None of the above

16. The _____ provides the advantage needed to retain control of a Monadnock PR-24 baton when it is grabbed from the front, rear or side by an opponent.
- Short End
 - Short Portion
 - Knob
 - Long Extended Portion
 - Short Handle

17. What vital area on the human body listed below would NOT be considered a RED AREA when being struck with a PR-24 baton?
- Bridge of Nose
 - Ear
 - Kidney
 - Rib Cage
 - Collarbone

18. What vital area on the human body listed below would NOT be considered a YELLOW AREA when being struck with a PR-24 baton?
- Knee Joint
 - Forearm
 - Elbow Joint
 - Shoulder Blade
 - Upper Arm

19. What vital area on the human body listed below would NOT be considered a GREEN AREA when being struck with a PR-24 baton?
- Thigh
 - Buttock
 - Lower Abdomen
 - Solar Plexus
 - Shin

This PR-24 Advanced Course SAMPLE written test may be reproduced only by Monadnock PR-24 Instructors who have been certified by the Monadnock PR-24 Training Council, Inc.

20. What PR-24 Basic Position block would provide the best protection against a blow coming to the top of your head?

- a. Strong Side Block
- b. Weak Side Block
- c. Middle Block
- d. Low Block
- e. High Block

21. What PR-24 Long Extended Two-Handed block would provide the best protection against a kick to your groin?

- a. Long Extended Two-Handed High Block
- b. Long Extended Two-Handed Low Block
- c. Long Extended Two-Handed Middle Block
- d. Long Extended Two-Handed Strong Side Block
- e. None of the above

22. What is the recommended way to remove accumulated dirt or film on the surface of a Monadnock PR-24 police baton?

- a. Acid
- b. Steel Wool
- c. Soap and Water
- d. 90% Solution of Isopropyl Alcohol
- e. Mineral Spirits

23. You are a right handed officer. What PR-24 Long Extended Two-Handed block would provide you with the best protection from a blow on your left side.

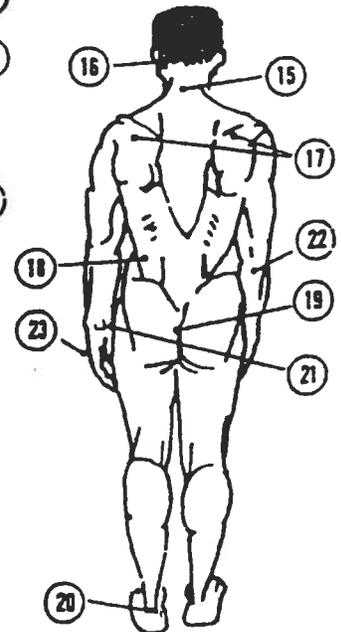

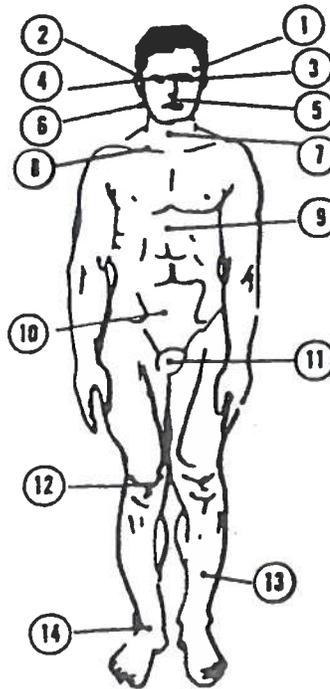

- a. Long Extended Two-Handed High Block
- b. Long Extended Two-Handed Low Block
- c. Long Extended Two-Handed Weak Side Block
- d. Long Extended Two-Handed Strong Side Block
- e. None of the above

24. You are a left handed officer. What PR-24 Basic Position block would provide you with the best protection from a blow on your right side.

- a. Long Extended Two-Handed High Block
- b. Long Extended Two-Handed Low Block
- c. Long Extended Two-Handed Weak Side Block
- d. Long Extended Two-Handed Strong Side Block
- e. None of the above

Answer the following questions by matching the target area to the number that locates it on the human body.

- 25. Collarbone 8
- 26. Kidney 18
- 27. Solar Plexus 9
- 28. Groin 11
- 29. Knee Joint 12
- 30. Elbow Joint 22
- 31. Throat 7
- 32. Instep 14
- 33. Jaw 6
- 34. Shoulder Blades 17
- 35. Back of Hand 23

CTS OC USER CERTIFICATION TEST

SCORE: _____

NAME: M BOGGS #204 DATE: 12-7-16

1. Oleoresin Capsicum (OC) is derived from: _____
 - a. Petroleum Products
 - b. Cultivated Plants
 - c. Chemical Agents
 - d. Synthetic Products
2. The International Color Code for OC is: _____
 - a. Red
 - b. Blue
 - c. Green
 - d. Yellow
 - e. Has No Color Code

ORANGE
3. The Minimum Safe Distance for dispensing OC Aerosol is: _____
 - a. 6 inches
 - b. 2 Feet
 - c. 3 Feet
 - d. 6 Feet
 - e. None of above
4. The Maximum Effective Distance for Dispensing OC is: _____
 - a. 8 Feet
 - b. 6-10 Feet
 - c. 12-15 Feet
 - d. 15-20 Feet
5. CTS OC is Target Specific.
 - a. _____ True
 - b. _____ False
6. When Dispensing OC on an individual, the point of aim should be _____.
 - a. Center of Chest
 - b. Chin
 - c. Forehead
 - d. Across Shoulders
7. An Officer should always use his/her gun hand to dispense CTS OC.
 - a. _____ True
 - b. _____ False
8. Oleoresin Capsicum is classified as a _____.
 - a. Irritant
 - b. Inflammatory

- c. Lacrimator
- d. Chemical Agent
- e. None of the above.

9. The "First" step to be taken in the decontamination process of an individual should be _____
- a. Restrict the contaminated person's activities.
 - b. Flush contaminated areas of the body with water.
 - c. Remove the person from the contaminated area to fresh air.
 - d. Reassure the person that the effects will soon pass.
 - e. All of the above.
10. To ease the burning sensation and speed the decontamination, _____ may be applied to the affected areas of the individuals body.
- a. Salves
 - b. Creams
 - c. Hot Towels
 - d. Water
 - e. All of the above.

I certify that I have been trained and demonstrated proficiency in the dispensing, effects, and Decontamination for CTS OC Aerosol.

PR-24 Side Handle Baton Test

Name: PTL BOGGS #294

Date: 9/13/18

1. If a subject grabs the short portion of your baton from the front, you should:
 - a. Call for assistance
 - b. Yank the short handle from the subjects hands while striking his forearm with your weak hand
 - c. Say; Let GO!
 - d. Take no action
 - e. None of the above

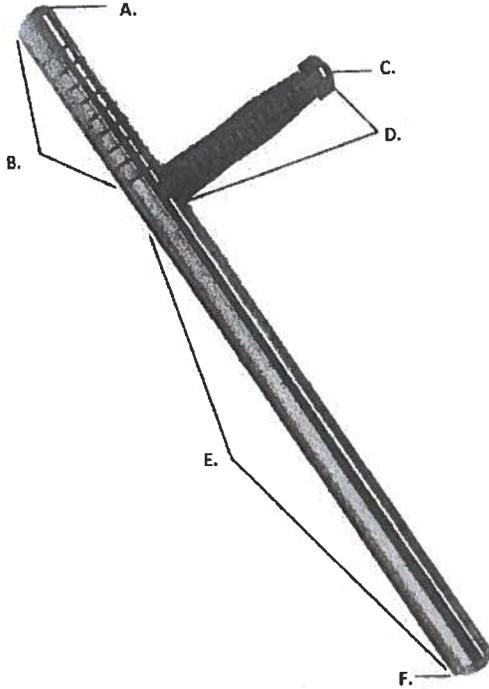

2. The three methods of carrying the baton are:
 - a. Horizontal, Vertical and Two handed
 - b. Weak side, Strong side and Concealed
 - c. Riot mode, Defense mode and Attack mode
 - d. Trunk, Briefcase and Tether
 - e. Right handed, Left handed and On the belt

3. The _____ is considered a "No Strike" zone unless deadly force is justified:
 - a. Head
 - b. Throat
 - c. Solar Plexus
 - d. Temple
 - e. All of the above

4. When using a one handed high block, it is prudent to keep the _____ away from your head.
 - a. Riot Shield
 - b. Long Extended End
 - c. Short End
 - d. Knob
 - e. Sun

5. Soap and Water should be used to clean a PR-24 Side Handle Baton.
 - a. True
 - b. False

PR-24 Side Handle Baton Test

6. Match the letter from the above diagram to the corresponding description:

A	Short End
B	Short Portion
D	Short Handle
C	Knob
E	Long Extended Portion
F	Long Extended End

AR-15 USER/OPERATOR COURSE TEST

NAME: PTR BOGGS #294

DATE: 9/26/19

SCORE: 100% GOOD JOB!

1. List the four primary rules of firearm safety.
 - a. TREAT ALL FIREARMS AS IF LOADED
 - b. DON'T ALLOW Muzzle to come anything that not want to be shot
 - c. KEEP FINGER OFF TRIGGER AND OUTSIDE GUARDS
 - d. BE SURE OF TARGET AND BEHIND
2. List the six principles of marksmanship.
 - a. STANCE / BODY POSITION
 - b. GRIPPING WEAPON
 - c. SIGHT ALIGNMENT / PICTURE
 - d. TRIGGER CONTROL
 - e. BREATHING
 - f. FOLLOW THROUGH
3. List the three operational loading objectives.
 - a. MAINTAIN CURVE
 - b. RECALIBRATE WHEN TARGETS CHANGE
 - c. DON'T CURVE TARGET WITH NON FUNCTIONAL WEAPON
4. List the three steps of immediate action procedures.
 - a. SCENT
 - b. DRAW
 - c. ENGAGE
5. List six points of Close Quarter Battle (CQB) covered in class.

- a. SUPPORT ARM STRAIGHT
 - b. SIGHTS AT ZERO LEVEL
 - c. TRIGGER FINGER EXTENDED
 - d. THRUST WEAPON
 - e. SAFETY TO FIRE
 - f. WEAPON IN LINE AND ON TARGET
6. List four of the six alternative shooting positions.

- a. STANDING
 - b. KNEELING
 - c. SITTING
 - d. PRONE
7. Explain how to properly load a magazine (how many rounds).

LOAD FULL TACK 2 OUT

8. Explain the loading sequence from an open bolt position

SAFETY ON SAFE

SEAT MAG/PULL

PERFORM BOLT CHECK

9. Explain the loading sequence from a closed bolt position

SEAT INSERT MAGAZINE W/ SUPPORT HAND

PULL DOWN MAG

SUPPORT HAND PULL FORWARD HANDLE

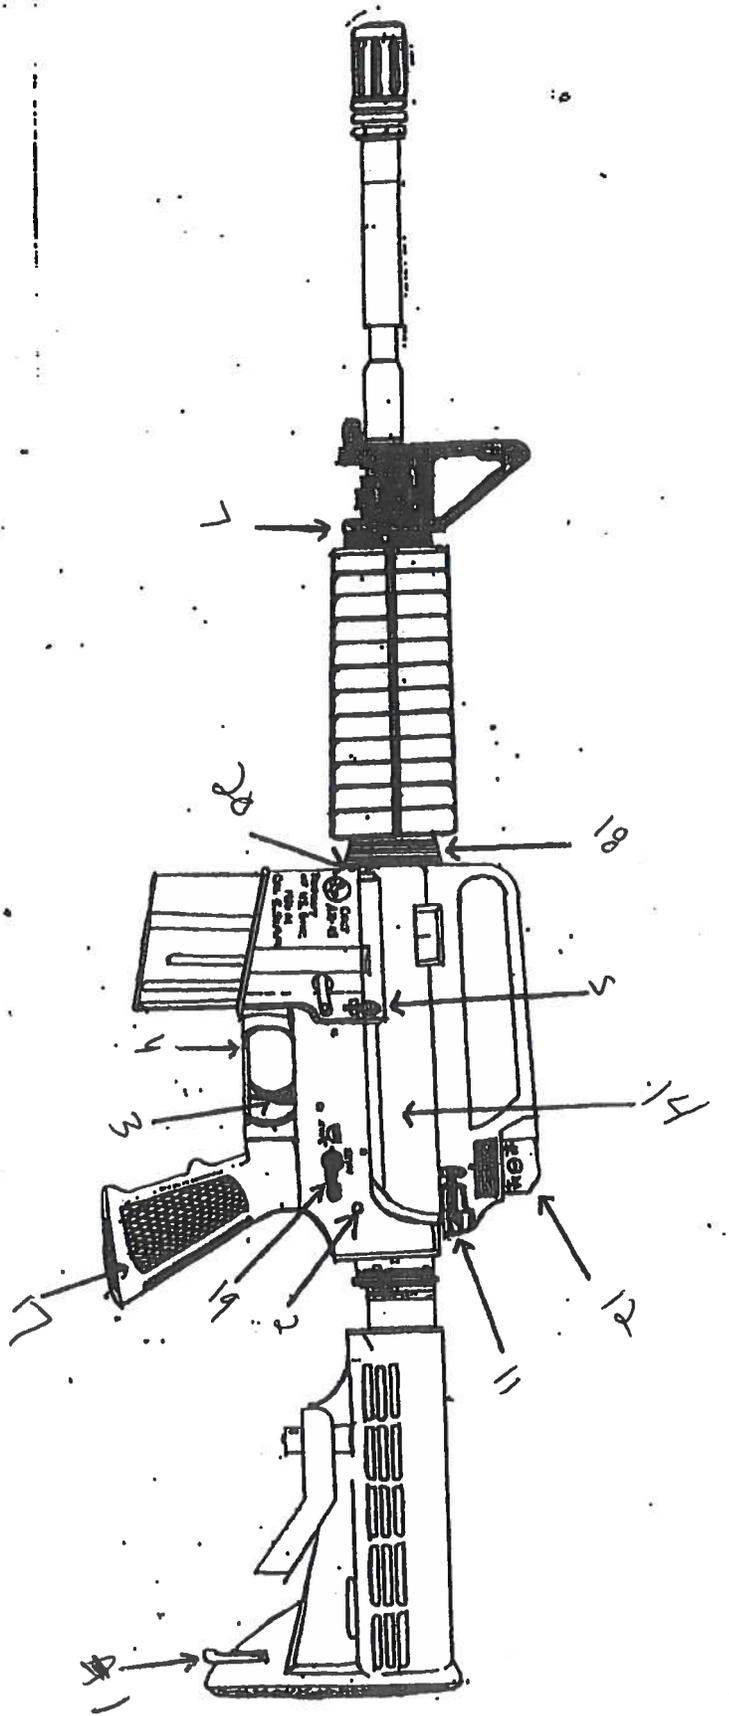

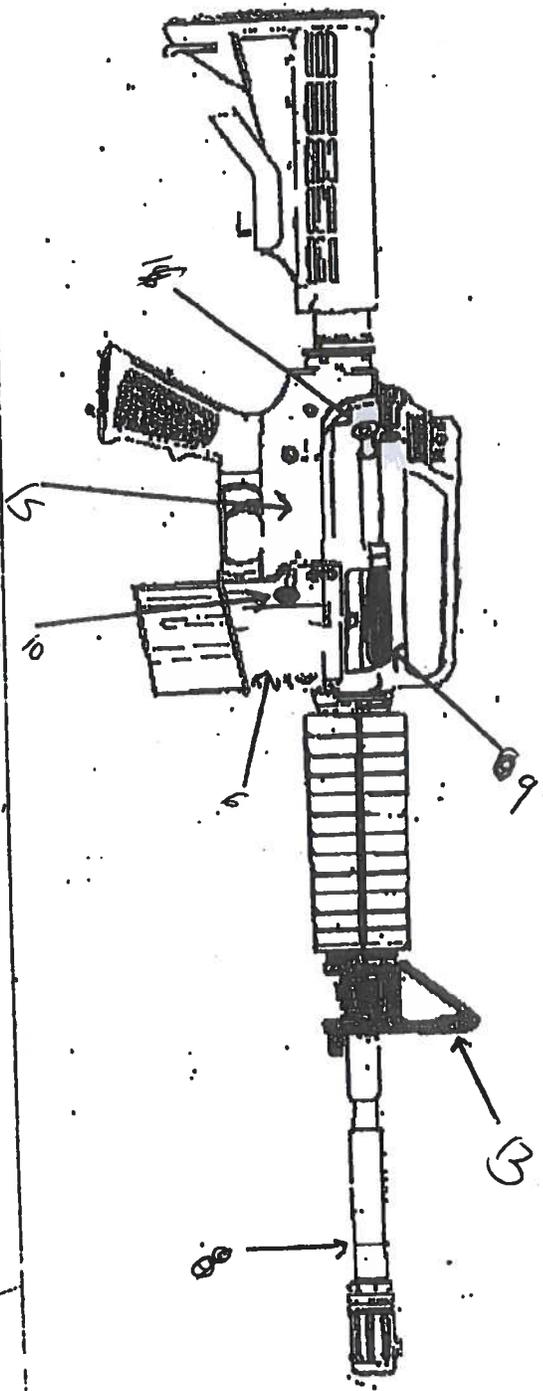

10. A shooter can fire 30-40 rounds a minute accurately.

11. The student properly disassembles and then reassembles the AR-15 rifle for cleaning and inspection.

Pass X Fail _____

Label the following parts on the AR-15

- 1. Stock and sling attachment point**
- 2. Rear take down pin**
- 3. Trigger**
- 4. Trigger guard**
- 5. Bolt release**
- 6. Magazine well**
- 7. Front sling attachment**
- 8. Barrel**
- 9. Ejection port cover**
- 10. Magazine release button**
- 11. Charging handle**
- 12. Rear sight assembly**
- 13. Front sight assembly**
- 14. Upper receiver**
- 15. Lower receiver**
- 16. Forward assist**
- 17. Pistol grip**
- 18. Barrel nut/Delta ring**
- 19. Safety lever**
- 20. Front take down pin**
