

Ohio Attorney General's Office  
Bureau of Criminal Investigation  
Investigative Report

2025-3739

Officer Involved Critical Incident – 4272 Cider Mill Drive,  
Cincinnati, OH 45245 (L)

**Investigative Activity:** Records Received, Review of Records

**Involves:** Thomas Mitchell Noble (S), [REDACTED] (S), [REDACTED] (S)

**Date of Activity:** 01/05/2026

**Author:** SA Lauren Frazier, #129

**Narrative:**

On January 5, 2026, Ohio Bureau of Criminal Investigation (BCI) Special Agent Lauren Frazier received two (2) Ohio BCI Laboratory reports for items of evidence that were submitted on November 21, 2025, for scientific analysis. The BCI laboratory case number is 25-135133.

The first report originated from the DNA section of the laboratory and was authored by Forensic Scientist Peter Tassi. The items relevant to this report which had previously been submitted were as follows:

- 3. White box contained Airsoft BB gun (S#21M014661) (Scene #1, item 5)

DNA samples were collected but were not forwarded for DNA analysis at this time.

The second report originated from the firearms section of the laboratory and was authored by Forensic Scientist Daniel Steiner. The BCI Firearms Section was requested to perform an analysis of the officers' firearms, as well as the firearm-related evidence collected from the scene (casings and bullets). By comparing evidentiary cartridge casings/projectiles to known standards from each weapon, identifications can be made as to which casings/projectiles were fired from each firearm. The items relevant to this report which had previously been submitted were as follows:

- 1. One (1) fired 5.56mm NATO cartridge case
- 2. One (1) fired 9mm Luger cartridge case
- 4. One (1) Smith & Wesson model M&P M2.0, 9mm Luger semi-automatic pistol, serial # [REDACTED], with attached flashlight and optic sight, three (3) magazines, and fifty (50) unfired 9mm Luger cartridges
- 5. One (1) fired 5.56mm NATO cartridge case
- 6. One (1) fired 5.56mm NATO cartridge case
- 7. One (1) fired 5.56mm NATO cartridge case

This document is the property of the Ohio Bureau of Criminal Investigation and is confidential in nature. Neither the document nor its contents are to be disseminated outside your agency except as provided by law – a statute, an administrative rule, or any rule of procedure.

- 8. One (1) fired 5.56mm NATO cartridge case
- 9. One (1) Smith & Wesson model M&P-15, 5.56 NATO semi-automatic rifle, serial # [REDACTED] with two (2) magazines and fifty-four (54) unfired 5.56mm NATO cartridges
- 10. One (1) fired 5.56mm NATO cartridge case
- 11. Two (2) fired bullet jacket fragments & two (2) lead fragments

#### Findings:

- Smith & Wesson pistol (S/N [REDACTED]) – operable
  - One (1) fired 9mm Luger cartridge case – source identification
- Smith & Wesson rifle (S/N [REDACTED]) – operable
  - Six (6) fired 5.56mm NATO cartridge cases – source identification
- Two (2) fired bullet jacket fragments:
  - Smith & Wesson pistol (S/N [REDACTED]) – source exclusion
  - Smith & Wesson rifle (S/N [REDACTED]) – inconclusive
- Two (2) lead fragments – unsuitable

A copy of the Ohio BCI Laboratory reports are attached to this report. Please refer to the attachments for further details.

OHIO ATTORNEY GENERAL

## Bureau of Criminal Investigation

## Laboratory Report DNA

To: Ohio Attorney General's Office  
Holly Ryczek  
30 E. Broad Street  
Columbus, OH 43215

BCI Laboratory Number: 25-135133

Analysis Date: November 25, 2025

Issue Date: December 03, 2025

Agency Case Number: 2025-3739

BCI Agent: Holly Ryczek

Offense: Officer Involved Critical Incident

Subject(s):

Victim(s):

### Submitted on November 21, 2025 by Holly Ryczek

3. White box containing Airsoft BB gun (S#21M014661) (Scene #1, item 5)

Item	Conclusions
3 Airsoft BB gun (S#21M014661) (Scene #1, item 5)	
3.1 Swab of trigger	Sample collected for DNA analysis
3.2 Swab of grip	Sample collected for DNA analysis
3.3 Swab of back slide area	Sample collected for DNA analysis
3.4 Swab of textured buttons/levers	Sample collected for DNA analysis
3.5 Swab of front sight area	Sample collected for DNA analysis
3.6 Swab of CO <sub>2</sub> holder	Sample collected for DNA analysis

### Remarks

All evidence will be returned to the submitting agency. Samples are not being forwarded for DNA analysis at this time.

9. One cardboard box containing fired cartridge case (Scene #1, item #11); actually found to contain firearm (SN: [REDACTED])
  - One (1) Smith & Wesson model M&P-15, 5.56mm NATO semi-automatic rifle, serial # [REDACTED] with two (2) magazines and fifty-four (54) unfired 5.56mm NATO cartridges
10. One manila envelope containing fired cartridge case (Scene #1, item #12)
  - One (1) fired 5.56mm NATO cartridge case
11. One manila envelope containing fired bullet fragments from autopsy of Tommy Noble (Scene #3, item #2)
  - Two (2) fired bullet jacket fragments
  - Two (2) lead fragments

## **Findings**

Item Description	Comparison	Conclusion
Item 4: Smith & Wesson pistol [REDACTED]	N/A	Operable
	Item 2: One (1) fired 9mm Luger cartridge case	Source Identification

Item Description	Comparison	Conclusion
Item 9: Smith & Wesson rifle [REDACTED]	N/A	Operable
	Items 1, 5 - 8, 10: Six (6) fired 5.56mm NATO cartridge cases	Source Identification

Item Description	Comparison	Conclusion
Item 11: Two (2) fired bullet jacket fragments	Item 4: Smith & Wesson pistol [REDACTED]	Source Exclusion
	Item 9: Smith & Wesson rifle [REDACTED]	Inconclusive*

\*Similar class characteristics but insufficient corresponding individual characteristics to identify or exclude.

Item Description	Comparison	Conclusion
Item 11: Two (2) lead fragments	N/A	Unsuitable^

^Insufficient class and/or individual characteristics present.

## **Remarks**

The remaining submitted items from Items 4 and 9 were not examined at this time.

All evidence will be returned to the submitting agency.

## **Analytical Detail**

Analytical findings offered above were determined using visual, physical, and microscopic examinations / comparisons.

### Comparison Conclusion Scale

The following lists the conclusions a Forensic Scientist may reach when performing comparisons. In reaching a conclusion, a Forensic Scientist considers the similarities and dissimilarities and assesses the relative support of the observations under the following two propositions: the evidence originated from the same source or from a different source.

A Forensic Scientist may utilize their knowledge, training, and experience to evaluate how much support the observed similarities or dissimilarities provide for one conclusion over another. A conclusion shall not be communicated with absolute certainty. It is an interpretation of observations made by the Forensic Scientists and shall be expressed as an expert opinion.

1	Source Identification	The observations provide extremely strong support for the proposition that the evidence originated from the same source and the likelihood for the proposition that the evidence arose from a different source is so remote as to be considered a practical impossibility.
2	Support for Same Source	The observations provide more support for the proposition that the evidence originated from the same source rather than different sources; however, there is insufficient support for a Source Identification. The degree of support may range from limited to strong or similar descriptors of the degree of support. Any use of this conclusion shall include a statement of the factor(s) limiting a stronger conclusion.
3	Inconclusive	The observations do not provide a sufficient degree of support for one proposition over the other. Any use of this conclusion shall include a statement of the factor(s) limiting a stronger conclusion.
4	Support for Different Source	The observations provide more support for the proposition that the evidence originated from different sources rather than the same source; however, there is insufficient support for a Source Exclusion. The degree of support may range from limited to strong or similar descriptors of the degree of support. Any use of this conclusion shall include a statement of the factor(s) limiting a stronger conclusion.
5	Source Exclusion	The observations provide extremely strong support for the proposition that the evidence originated from a different source and the likelihood for the proposition that the evidence arose from the same source is so remote as to be considered a practical impossibility; or the evidence exhibits fundamentally different characteristics
