Bureau of Criminal Investigation  
Investigative Report**

2025-2243

Officer Involved Critical Incident - 3013 Mohawk Street,  
Middletown, Ohio 45044 (L)

**Investigative Activity:** Crime Scene Investigation  
**Involves:** Consuelo Denise Kerr (V)  
**Activity Date:** 07/13/2025  
**Activity Location:** 3013 Mohawk Street, Middletown, Ohio  
**Authoring Agent:** Senior Special David M. Hammond

**Narrative:**

On 07/13/2025 at approximately 1730 hours, S/A Hammond was contacted by SAS Sarah Taylor. She advised that the Middletown Police Department was called to 3013 Mohawk Street for a potential shooting. When officers arrived, they located Consuelo D. Kerr on the living room floor. Officers attempted to speak with her husband, Ronald Kerr, who was still inside the home. Initial indications were that the subject pointed or fired a weapon at officers. They returned fire, and the subject died as a result of his injuries. Mrs. Kerr was also pronounced dead at the scene.

The Middletown Police Department requested assistance in examining the scene and collecting potential evidence. S/A Hammond and CST A. Cruey accepted the request. Special Agents Steven Seitzman and Kenneth Smith responded from SIU/FIU.

S/A Hammond arrived at the scene at 1955 hours. CST Cruey arrived shortly after. The crime scene was secured with crime scene tape. Officers were actively protecting the perimeter. A search warrant for the scene had been obtained. Officers from the Middletown Police Department were attempting to secure two dogs that were inside the residence.

**Briefing:**

A preliminary briefing was provided to S/A Hammond by Det. V. Eley (Middletown Police Department). She advised that she received information that the couple was married and had been fighting most of the day. Things became violent when Consuelo D. Kerr told her husband, Ronald Kerr, that she was leaving him. Det. Eley indicated that the couple may have had an adult son who lived inside the home, and he may have witnessed a portion of the incident. He may have also called the police department.

It should be noted that this information was provided early in the investigation and may not reflect information learned through formal interviews or additional body

Middletown, Ohio 45044 (L)

camera footage. It was used as a baseline to identify potential evidence and establish crime scene processing goals.

The scene was examined with the assistance of Det. V. Eley (Middletown PD), Coroner's Investigator Matt Ashcraft, Coroner's Investigator Lara Fening, and Deputy Coroner, Dr. Daniel Nichaus.

3013 Mohawk Street was a one-story home with tan siding and brown trim. The home faced the west and was situated on the east side of the roadway. There was a handicap accessible metal ramp system leading from the sidewalk to the front door. The rear of the home features a small porch with a railing.

The crime scene was photographed as it was found. Digital images were uploaded to the Axon database (reference item Y). The crime scene was digitally mapped utilizing a Leica 360 scanner. The digital data was uploaded to the Axon database (reference item Z).

Two vehicles were present in the driveway of the home. They were:

1	Mazda	CX-9 AWD	Burgundy- SUV	Ohio KMU-4914
2	Honda	Odyssey	Gold - Van	Ohio KDW-4312

**Living Room:**

The first room inside the front door was the living room. The room was furnished with a large television set (north wall), love seat (east wall) and recliner (south wall). An end table was located at the north end of the love seat. It appeared that the lamp had been knocked off, displacing the lamp shade. This may indicate that some type of altercation occurred inside the room. Other possibilities exist.

Consuelo D. Kerr was found on the living room floor, in front of the love seat. She appeared to be a Caucasian female, in her 50s or 60s. She was of average height and weight and had long brown hair. Her head was pointed to the north and her feet were pointed to the south. Mrs. Kerr was lying on her back with her hips and legs turned to the east (left). Her knees were bent with her feet drawn upward. Her right arm was bent at the elbow with her hand resting on her chest. Her left arm was found along her side.

Mrs. Kerr was dressed in a gray, striped, short-sleeved shirt. She was wearing black shorts and white sandals. A pair of eyeglasses were found on her face.

Coroner's Investigator Matt Ashcraft assisted with examining Mrs. Kerr. He handled the victim so additional photography could be completed. He pointed out several wounds

2025-2243

Officer Involved Critical Incident - 3013 Mohawk Street,  
Middletown, Ohio 45044 (L)

to her chest. He also pointed to some potential wounds to her right hand. An examination of her back found additional wounds that may indicate that projectiles passed through her body.

Mrs. Kerr's shirt was heavily saturated with suspected blood from the area of the clavicle downward. Blood was found on her arms and hands.

Examination of the love seat, next to Mrs. Kerr located a large, suspected blood stain on the seat area (north side). A large volume of blood had been absorbed into the fabric. Staining on the front of the seat exhibited some feathering and striations, visually consistent with movement through the blood.

Examination of the love seat located holes in the fabric that were visually consistent with projectiles passing through. Damage was located on the backrest area of both sides of the love seat. An examination of the fabric on the back side located additional damage where the projectiles exited, traveling in a west to east direction. The fabric of the holes was pushed outwards, with cotton batting pulled outward by the suspected projectile. Corresponding damage was located in the east wall of the living room, behind the love seat. Further examination of the loveseat back rest located a bulge in the back, on the south side. A portion of the bulge was cut, exposing a medium caliber fired bullet, just inside the fabric. The bullet was encapsulated by cotton batting. It was collected as evidence (SW Inv. 36).

Based on the potential wounds to Mrs. Kerr's chest, the presence of volume blood on the seat and bullet holes located in the back rest, it appears that the victim may have been seated or positioned on the loveseat at some point during the incident. Other possibilities exist.

A search of the living room located several items of potential evidence:

**Evidence Collected**

Placard SW Inv. #	Item	Location	Retention
1	SCCY DVG-1 9mm Handgun SN: D025292 - Empty - Seated Magazine	Back of Recliner South Wall of Living Room	Ohio BCI
2	R-P 9mm Luger Cart. Case	Seat of Recliner	Ohio BCI
3	R-P 9mm Luger Cart. Case	Seat of Recliner	Ohio BCI

13.1	R-P 9mm Luger Cart. Case	Behind Recliner on Floor	Ohio BCI
36	Medium Caliber Fired Bullet	Back of Love Seat	Ohio BCI

A SCCY handgun was located on the headrest area of the recliner, along the south wall. The black, 9mm, composite handgun was identified with placard 1. The weapon's slide was locked in the rear position, and the magazine was seated. No ammunition was found inside the weapon.

A total of ten fired cartridge casings were located on the recliner and floor near Consuelo D. Kerr. Each of the cartridges were found have the headstamp R-P 9mm Luger. They were identified with placards 2-6 (seat of recliner), 8-10 (floor near recliner) and 13 (& 13.1) behind the recliner.

In addition to the cartridge casings, a cellular phone was located on the recliner. The phone was black in color and had a hinged or folding screen (placard 7). A second cellular phone (pink case) was located on the love seat. This phone was covered in suspected blood. It was identified with placard 11.

A second weapon was located inside the living room. A Diamondback handgun was found on the television stand near the hallway to the kitchen. The weapon was loaded with five cartridges in the magazine (capacity of 6) and one cartridge in the chamber.

A hallway was located in the east wall of the living. It connected the living room to a bathroom at the east end, two bedrooms to the north and the kitchen to the south-east.

2025-2243

Officer Involved Critical Incident - 3013 Mohawk Street,  
Middletown, Ohio 45044 (L)

**Northeast Bedroom:**

This bedroom appeared to be the master bedroom of the home. The walls in this room were painted grey with white trim. The room was furnished with a queen-sized bed, nightstand and dresser. A small built-in cabinet was located in the east wall. A search of the area located an open gun box on a lower shelf (placard 14). The black plastic box contained a chrome-colored magazine that was loaded with ammo. It also contained a blue gun lock and paperwork. The exterior of the box was marked with a "Walther" logo. A sticker at the end of the box contained the following information:

Walther	CCP	MZ Angel Blue	9x19
SN: WK151599	Made in Germany	#899 (Black Sharpie)	

A cursory examination of the area located some ammunition in a partially opened nightstand beside the bed. The ammunition included some Federal, American Eagle, 9mm Luger (FMJ - 115 grain). Also located in the drawer was some Winchester 38 special 130 grain FMJ. These items were identified with placard 15 and collected as evidence. There was no evidence that a portion of the shooting or that a struggle took place in this room.

**Northwest Bedroom:**

This bedroom appeared to be occupied by the adult son. It was furnished with a queen-size bed, flat screen television, small stand, office chair and gaming controllers. A cell phone was located on the bed along with an Ohio identification card. The Ohio ID card information was: Timothy Andrew McNeely (REDACTED).

The cell phone was identified with placard 16 but investigators later advised that the cell phone was not needed. It was not retained as evidence. There was no evidence that a portion of the shooting or that a struggle took place in this room.

**Kitchen:**

Ronald Kerr was located on the floor of the kitchen. He was located face down, with his head pointed to the west. He appeared to be a Caucasian male in his 50s to 60s. He had white/gray hair. Mr. Kerr was wearing a black tee shirt and black and white shorts. His hands were cuffed behind his back. A large volume of suspected blood was present on the floor, near Mr. Kerr. It appeared that he may have suffered an injury to his head.

Ronald Kerr was disabled. He appeared to be a double amputee (legs below the groin). It appeared that he used a motorized wheelchair to move about the home. The

Officer Involved Critical Incident - 3013 Mohawk Street,  
Middletown, Ohio 45044 (L)

wheelchair (black, Jazzy model, with red trim) was located just inside the doorway from the hallway into the kitchen. The wheelchair was facing into the kitchen. The left side of the wheelchair was adjacent to the refrigerator. The home's furnace and the west wall were on the right side. A search of the area located a handgun and fired cartridge casing close to the wheelchair.

A chrome and blue handgun was located beneath the wheelchair, in the confined space. The weapon was barely visible in photographs, below the motorized mechanism of the chair. It was moved outwards from its original position to aid in photography. It was identified with placard 17 in photographs. The weapon information was:

Walther CCP	Chrome / Light Blue	9mm	SN: WK151599
1 Cartridge in Chamber	4 Cartridges in Seated Magazine (Capacity 7)	Slide Forward Safety Off	Weapon Covered in Suspected Blood

A fired cartridge casing was located on the floor of the kitchen between the wheelchair and west wall. It was located beside a mop and bucket (placard 18). The fired cartridge casing was a R-P 9mm Luger.

Examination of the refrigerator located an area of discoloration that was visually consistent with a gunshot residue deposit. The grey/black material was located on the south surface, approximately 3' 4" above the ground. The shape of the deposit was linear with a slight V at the east end.

Further examination of the area located a Ballistic Incident (bullet hole) in the wall that separated the refrigerator area from the countertop. This area was identified with placard BI 7.0. The suspected bullet hole was located approximately 3' above the floor. The suspected bullet hole was symmetrical in shape and measured approximately 10-12mm in width. The margins of the hole were pushed inward, consistent with the projectile originating from a position west of the wall.

It appears that a projectile passed through a can of Great Value French Vanilla coffee creamer and a Kraft French dressing bottle. Areas of orange staining were present on the walls of this area, consistent with the bottle partially dispersing the contents under the pressure of the impact.

Corresponding damage was located on the east side of the same wall. It appears that the projectile perforated the wall, impacting a metal drinking cup and the edge of the counter at the sink. A search of the area located a medium caliber, fired bullet

Middletown, Ohio 45044 (L)

(jacketed, round nose) on the countertop. It was identified with placard 20 in photographs.

Examination of the evidence at this location of the kitchen suggests that a weapon may have been fired from the location of the refrigerator towards the east, in the general direction of the kitchen sink or rear door. This is based on the position of the wheelchair, location of the Walther handgun, fired cartridge casing, possible gunshot residue, suspected bullet holes and location of the fired bullet. Other possibilities exist.

**Reference Photos for BI 7.0 & Fired Bullet**

Information provided by CST Cruey indicated that Middletown Police Officers may have entered into the home via the rear door located at the east end of the kitchen. CST Cruey met with officers and documented weapons that were utilized during the incident. Those weapons were exclusively rifle platforms, firing .223 projectiles. For further information, please refer to reports by CST Cruey.

Evidence was present in the area of the refrigerator area that would indicate the multiple bullets were fired in the direction of the wheelchair.

A possible Ballistic Incident was located on the south-west corner of the refrigerator. It was identified as BI 8.0. The BI was located approximately 3' 7 ½" above the floor. It

Middletown, Ohio 45044 (L)

was elliptical in shape. A lead in mark was present on the east side of the damaged area. This would indicate that the projectile originated from a position, south and east of the refrigerator. The projectile continued through the metal along a west trajectory.

Eight additional Ballistic Incidents were located in the west wall of the kitchen, adjacent to the wheelchair. The areas of damage were identified as BI 9.0 through BI 16.0. Each of the holes in the plaster wall were large in size and irregular in shape. They were visually consistent with projectiles impacting the wall and penetrating the plaster. A search of the area located a possible fired bullet in the hallway, behind the wheelchair. The projectile was badly deformed. It was identified with placard 19 and collected as evidence.

A search of the remaining portions of the kitchen located five Speer, 21, REM 223 fired cartridge casings on the floor near the rear door. They were identified with placards 21-24 & 35.

An area of damage was noted in the rear door glass. It appeared that a portion of the exterior pane had been damaged, causing the insert to shatter.

**Rear Porch – Yard:**

The rear kitchen door opens onto a wooden rear porch. Examination of the area located a large, black, Police ballistic shield. The shield had been deposited onto the floor. It was examined for possible damage, none was found. Four additional Speer, 21, REM 223 fired cartridge casings were located on the floor of the porch, near the rear door. They were identified with placards 25-28.

A search of the rear yard, directly beside the porch located six additional Speer, 21, REM 223 fired cartridge casings. These casings were located near the north-east corner of the porch in the grass.

A total of 14 rifle cartridge casings were located at the scene.

Examination of the walls of the home near the porch located six possible Ballistic Incidents. They were identified with placards BI 1.0 – BI 6.0. They ranged in height from 3'8" to 4'4" above the ground. Each of the holes appeared nearly symmetrical in shape in the plastic siding. It appears that several shots were fired into the home from the outside. Two projectiles perforated the kitchen wall near the north-east corner. Three additional projectiles perforated the adjoining bathroom wall exiting the area of the bathtub.

The Butler County Coroner's Office assisted in placing Consuelo and Ronald Kerr into new, clean body bags. They were transported from the scene for autopsy at a later date (refer to reports by CST Cruey).

Evidence in this case was retained by CST Cruey for transport to the London Office of BCI. A copy of the search warrant and inventory form were left inside the home. S/A Hammond and CST Cruey cleared from the scene at approximately 0100 hours.

Investigation to continue.
